

FLEMING'S
FARM AND LIVE STOCK
ALMANAC 1917

Published by
FLEMING BROS. • Chemists
UNION STOCK YARDS • CHICAGO

The purpose of this diagram is to show the approximate location of the ailments and blemishes named. To present in print the actual likeness of a blemish as it appears upon a horse is practically impossible and has not been attempted. On another page of this almanac brief mention is made of a number of the blemishes here indicated, and for more complete information we refer you to Fleming's Vest-Pocket Veterinary Adviser. We have remedies for treating all the ailments named on this diagram, and for others not mentioned here. If you will read this almanac through you will obtain a very good idea as to what Fleming's Remedies are for and what they may reasonably be expected to do.

The Twelve Signs of the Zodiac

Have You a Copy of Our Veterinary Adviser?

Fleming's Veterinary Remedies, though there are several of them, do not afford a suitable treatment for all ailments of horses and cattle. With a view to rendering farmers all the assistance we can in the treatment of their ailing stock, and also with a view to setting forth clearly and adequately the uses and limitations of our own remedies, we have published Fleming's Vest-Pocket Veterinary Adviser. This book contains 192 pages, 69 illustrations, and is durably bound in leatherette. It covers over two hundred veterinary subjects, describing diseases so that you will know how to recognize them by their symptoms, telling you their nature and cause, and what you should do to cure them. The illustration on the back cover of this almanac will afford you a fair idea as

to what the book looks like. We believe it is the best veterinary book ever published to meet the needs of the average farmer, and will gladly mail a copy free of charge to those who believe it would be helpful to them and will write for it.

Because Fleming's Vest-Pocket Veterinary Adviser describes nearly all the diseases of horses and cattle so fully and clearly and may be had for the asking, we shall not take space in this almanac to describe even the diseases that our remedies are for. Instead, we shall describe very briefly the remedies themselves, and devote the major portion of available space to the publication of letters that will afford the reader a fair idea as to the kind of work they do.

Fleming's Almanac For 1917

The breeders' tables that appear in connection with the monthly calendars of this Almanac are intended merely to show the date upon which the period of gestation may be expected to end. For illustration, refer to the calendar for January and to the first day of that month. Following the line across the page, you come to four dates that appear in separate columns. These tell you that if the date of breeding were January first, a mare should foal on the following December 6th, a cow should calve on October 10th, a ewe should lamb on May 30th, and a sow should farrow on April 22d. Of course, there may be some variation in the time, one way or the other, but the dates given represent the average. The blank spaces at the extreme right are for names of animals or other brief memoranda.

The moonlight characters that appear in the third column from the left upon each calendar page, are not intended as pictures of the moon, or as any representation of the moon itself. Instead, you are to regard them as you would the face of a clock from which the hands have been removed. The lowest point of each circle means six o'clock P. M. of the date in connection with which it appears. From that point on around the circle in the direction that the hands of a clock move, represents the whole night, or the time from six o'clock in the evening until six o'clock the next morning. If the circle is all black, it means that there will be no moonlight that night. If it is all white, it means that there will be moonlight all night. If it is part white, it means that there will be moonlight during the hours approximately indicated by the white portion of the circle when regarding it as a dial.

(Continued on page 3.)

Twenty-One Years Old

The year 1917 will mark the twenty-first anniversary of the establishment of our business, which has now become so well known among farmers and stockmen over the entire continent.

The beginning was, of course, small, and the birthplace was a little town in a far northwest province of Canada, in the midst of what was at that time an extensive cattle grazing section, with an abundance of wild hay as winter provender, but which is now devoted more to diversified agriculture. Something as to how it came about that the business of Fleming Brothers was brought into being is told on page 27 of our Veterinary Adviser, and need not be repeated here.

This number of our Almanac, therefore, might properly be called our twenty-first birthday anniversary number, but in reality it is much the same as our previous ones, devoted very largely to testimonial letters from owners of live stock who tell what satisfaction they have had from the actual use of our veterinary preparations. After all, that is the most important information that could be given in it. We might fill it up telling what we think about our goods, but if we were farmers and owners of animals likely to die or become worthless, we would a whole lot rather read what some other man who has been up against the same situation has to say after having given the goods a trial, and we believe that is the way you feel about it.

This birthday matter, however, really has a significance that may properly be referred to in a brief way. Twenty-one years is a good while. In a way it may not seem long, for when we are busy year in and year out, particularly we older ones, time often slides along without our taking much notice of it, but if we will just think back to how old we were and what we were doing twenty-one years ago, the fact will loom before us that a great big piece of time has elapsed. Now, the significant thing that we want to speak of is that an article that stays upon the market twenty-one years has to be good; indeed, it has to be very good. If not good, the people will have found it out and ceased to buy it long before such a time period has expired. If moderately good or just pretty good, something better will almost surely have come up and taken the demand away from it, leaving it as dead as the one that failed altogether from lack of merit. But if the twenty-first year finds it in stronger demand than ever, and practically the only thing of its kind upon the market, the meaning must be that it is very good, and well deserving of the success that it has met with.

Fleming's Actinoform has made just such a record, and our other leading preparations are close behind it in point of age, but not at all behind from the standpoint of work performed

and growth in public favor. The only baby in the family is the General Liniment, and that is scarcely a baby now, but instead a lusty youngster.

In the foregoing we have made reference to the testimonials that appear in this Almanac. The dates that the original letters bear are not given, as by leaving out the dates a line of space is saved. However, all these letters have been received since copy for our 1916 Almanac was prepared; in other words, within the year. In the same interval we have received hundreds of other testimonials, the writers of which will receive a copy of this Almanac. To these we wish to say that not finding your letter published does not mean that we do not appreciate your having written it. It merely means that we could not provide space for all. The Fistoform testimonials alone would much more than fill the book from cover to cover. We say, therefore, that we truly thank every man who has taken the trouble to write us of the good work done, and by so doing has shown that his heart is in the right place. Such letters help to make business worth while, and they do us good, even if we cannot print them all and send them out with a view to doing good wherever our Almanac is read.

A Book To Help You

We try to give in this Almanac a fairly adequate understanding as to what Fleming's Veterinary Preparations are for. Such information will be gathered by reading the brief descriptions that we give, and also the letters from those who have used them.

We have another book that we will gladly send free of charge to any farmer who has animals requiring treatment, and who will drop us a card asking for a copy. If you already have one, you will not need another, but if you haven't, we would like to place one in your possession, particularly if you contemplate using one or more of our remedies.

The book we speak of is Fleming's Vest-Pocket Veterinary Adviser. It is not only more ample in explaining the uses of our preparations, but it contains illustrations and descriptions so that you may better judge as to what is wrong with an animal and whether one of our remedies would be suitable for treating the ailment. It is not a large book, but contains a lot of information in concise form. Because the publication of these books is quite an expense to us, we do not send them out in quantities for distribution, but merely single copies to those who feel sufficiently interested to write for them.

Our Regular Preparations Are All That We Supply

Some seem to think that because the Veterinary Adviser gives information upon nearly all the more common ailments of horses and

cattle, we can supply practically anything that may be wanted in the line of veterinary remedies. That is not correct. We do not put up special remedies for special cases. The preparations named in the price list on last page of the Adviser, and on the inside of the back cover of this Almanac, are all that we make or handle. Do not send an order for anything else whatever, as it would merely have to be returned. Unless it is clear to you that your case is one of those for which an article of our manufacture is intended, we cannot be of help.

Our Business Policy

When we began, we decided that a medicine that is good enough to be sold should be good enough to be guaranteed by the seller. By this we mean that the seller should be willing to refund to the purchaser the amount paid if the treatment proves unsatisfactory. That is about the most severe test that could be applied to any article of merchandise, even such things as clothing, machinery, etc., which, however, we do not usually get a chance to buy upon any such terms. With our line, it is a particularly rigid test of merit, because so many people are habitually careless and do not follow up the treatment with strict regard to the directions; in fact, we have even known some to treat first and read the directions afterward. There are three things to consider carefully when you conclude to treat an animal. First, you should know what is wrong with him; secondly, you should make sure that the remedy you contemplate using is one that is intended for such a case, and lastly, you should go over the directions carefully and understand just how to do it before starting in.

If any one of Fleming's Veterinary Preparations doesn't do the work it is recommended to do, we will refund to you its price, you to be the judge, and your word to go.

The paragraph here printed is our guarantee as it applies in general to our line of goods. As already stated, it has been in effect twenty-one years. It does not mean that you can use our preparations upon any sort of case that you may conclude to experiment with and get your money back if not successful. It means that they are to be used for their proper purposes, in accordance with the directions, and are to be successful to the extent of the representations made in our printed matter, particularly the Veterinary Adviser. Its purpose is to insure you your money's worth or your money back. It leaves the decision to the customer, and we trust you to be as fair with us as we are disposed to be with you. It does not mean, however, that one bottle or package must always be enough for the case. This is particularly true with regard to the Fistoform and the Tonic Heave Powders. Read what is said further on in this Almanac about the different preparations, and we think you will understand how the guarantee should apply to each.

If any case proves obstinate, write us the full particulars about it before either persevering too far or abandoning the treatment, and if we can make any suggestions that may prove helpful, we shall be pleased to do so. When nothing is heard from the customer within a year, we regard the guarantee as having expired by lapse of time.

Not Infallible

Some seem to get the idea, which has often been expressed to us in letters, that our preparations never fail to do the work they are meant to do. We suppose the reason is because we make so broad a guarantee and because such wonderful results are told of in the testimonial letters that we print.

The fact is, there is no remedy so good that it cannot fail, nor was there ever a doctor so competent as to be able to cure every patient that he might try to cure. However, a remedy may be good enough, or a doctor may be competent enough, to cure usually and fail only occasionally, and that explains how it is with our preparations and why we can guarantee them as we do. The testimonials are printed because they afford the best means of making it clear to you what our remedies may reasonably be expected to accomplish, and the guarantee is to protect you against loss of the amount paid in case of failure.

We Send Full Directions

Fleming's Remedies are all easy to use, and this in spite of the fact that the principal ones are for diseases of a formidable character.

No one need hesitate through fear that because he lacks experience he will be unable to conduct the treatment properly.

Directions that make everything plain are sent with every bottle or package.

Of course, we do not mean that in any instance the work is so simple that you can disregard the directions and treat in an altogether careless manner, and still get the result you are after.

The first thing to do is to read the directions carefully, and several times over, if necessary, and make sure that you understand just how it is to be done, then it will be easy to do it just that way.

What you read in the direction sheet is meant in just as full a sense as though you were reading it in a letter that we had written you.

Ordering

On the inside of the back cover of this Almanac is a complete price list and other information to guide you in ordering. Observe what is said in the column headed, "Points for Special Notice." Druggists do not very generally handle our line, because the diseases for which our leading preparations are intended, occur only in a scattering way, so that there would not be a sufficiently steady demand for the average druggist to keep them in stock.

The greater part of our business, therefore, is done direct with individual customers who send their orders to us. In making remittance, do not send personal checks if at all convenient to employ some other method. Note what is said upon this subject in the column to which we have referred you.

Morning and Evening Stars

The Planet Venus is Morning Star until April 26th, then Evening Star the rest of the year.

The Planet Mars is Evening Star until Feb. 28th, then Morning Star until the close of the year.

The Planet Jupiter begins as Evening Star and continues as such until May 9th, after which date he is Morning Star until November 28th, then Evening Star until the close of the year.

The Planet Saturn is Evening Star until July 27th, then Morning Star the balance of the year.

Eclipses for 1917

In the year 1917 there will be seven eclipses, four of the Sun and three of the Moon, as follows:

The first is a Total Eclipse of the Moon, Jan. 7th and 8th. Visible in all parts of the United States, Western Europe, Africa, South America and Pacific Ocean, occurring as follows:

Central Time.

Moon enters shadow....	Jan. 7th, 11:50 P. M.
Total eclipse begins....	Jan. 8th, 1:00 A. M.
Middle of the eclipse....	Jan. 8th, 1:45 A. M.
The total eclipse ends....	Jan. 8th, 2:29 A. M.
Moon leaves shadow....	Jan. 8th, 3:39 A. M.

For Eastern Time add one hour; for Mountain Time deduct one hour; for Pacific Time deduct two hours.

The second is a Partial Eclipse of the Sun, January 22d. Invisible in the United States.

The third is a Partial Eclipse of the Sun, June 19th. Invisible in the United States.

The fourth is a Total Eclipse of the Moon, July 4th. Invisible in the United States.

The fifth is a Partial Eclipse of the Sun, July 18th. Invisible in the United States.

The sixth is an Annular Eclipse of the Sun, Dec. 14th. Invisible in the United States.

The seventh is a Total Eclipse of the Moon, Dec. 28th. Visible in all parts of the United States, South America, Northeastern Asia, Australia and throughout the Pacific Ocean, occurring in the United States as follows:

Central Time.

Moon enters shadow....	Dec. 28th, 2:05 A. M.
Total eclipse begins....	Dec. 28th, 3:38 A. M.
Middle of the eclipse....	Dec. 28th, 3:46 A. M.
The total eclipse ends....	Dec. 28th, 3:57 A. M.
Moon leaves shadow....	Dec. 28th, 5:27 A. M.

For Eastern Time add one hour; for Mountain Time deduct one hour; for Pacific Time deduct two hours.

Actinoform

Per bottle, \$2. See assortment offer on Inside of back cover.

Sent prepaid on receipt of amount.

Fleming's Actinoform is for actinomycosis in cattle in its most common manifestation known as lump jaw. It is the one remedy for this disease that has stood the practical test and attained a large sale, and is the oldest preparation of its kind upon the market.

Lump jaw begins as a small hard lump, usually moveable under the skin, but sometimes fast to the jaw bone. It occurs upon either the upper or lower jaw, but most frequently the lower, and sometimes back of the angle of the lower jaw below the ear. It increases in

size, then softens, breaks and discharges a thick, stringy pus of a yellowish color. This drawing may afford you some idea as to what an advanced case looks like.

Lump jaw does not get well of its own accord. You have to cure it, and if you have a case, we believe that Fleming's Actinoform affords the best chance there is to cure it. Each package contains directions that are plain and easy to follow, and we agree to refund the amount you paid if you buy and use Fleming's Actinoform and fail to effect a cure.

In Fleming's Vest-Pocket Veterinary Adviser a more complete description of lump jaw is given, and if you have a case that you think may be that disease, we would like to have you read what is said about it in this book, and will gladly mail you a copy upon request.

Actual performance is the conclusive test of merit in any remedy, and by reading the letters that follow, you will learn what Fleming's Actinoform has been doing for farmers and stockmen for a period of twenty years. Do not lose an animal when there is an available chance to save him. We refund the cost of the treatment if it is not successful.

Cured a Dozen.

Gentlemen:—Please mail me a copy of your Veterinary Adviser. I have used your Actinoform on more than a dozen cases with great satisfaction. It has done the work every time. I saw your ad in Breeders Gazette.—R. M. Moody, Lenexa, Kans., R. R. No. 1.

Loaned It Out.

Dear Sirs:—A few years ago I got a bottle of your Actinoform, and it did excellent work. After the case was healed, nobody could see that

the cow had had lump jaw. I cured one of my cows and two other cows were cured from the same bottle. It is more than half full yet, but by loaning it out, the directions got lost and we forgot how to use it. Will you please send me the directions, also Fleming's Vest-Pocket Veterinary Adviser? I never begrudged the two dollars I paid for that bottle of Actinoform, and I do not want to be without it. It did not leave any scar.—Stephen Cunfer, Drums, Pa., R. No. 1, Box 19.

Applied Twice.

Dear Sirs:—I used your Actinoform upon an animal that had a very bad case of lump jaw, and it cured by applying only twice. That was in 1907. I have great faith in your remedies and know of none to equal them.—Henry Sutphin, Fairfax, Va., R. F. D. No. 1.

Great Stuff.

Gentlemen:—I am a little late in reporting to you on the Actinoform, but I had a bad case and thought I would wait a time. It is great stuff. I was told that local applications were not advisable, but a constitutional treatment was the only thing. The second application knocked it high. I also used several bottles of your remedy several years ago on my cows and on some of my neighbors' cows with good success.—L. C. Reed, Westport, Minn.

Had Spent About \$50.

Gentlemen:—One bottle of your Actinoform has cured four head for me after having paid the doctors about fifty dollars. The first I knew of you people was when I saw your Actinoform advertised in the paper.—Wm. Langley, Caseville, Mich.

Would Soon Have Died.

Dear Sirs:—I was looking at your Almanac and noticed that some of your patrons have written and told you of their success in using Fleming's Actinoform, and if I can help the good work along by giving my experience, I will gladly do so. We have a very large black cow. She first got foxtail in her jaw and it broke and ran. That healed, then lump jaw commenced. Our cattle run on the open range, so we just let her alone until she got so poor she could hardly get up. She could hardly chew and her tongue hung out of her mouth. We came to the conclusion that her jaw-bone was eaten in two. We hated to shoot her, but it seemed only a matter of a few days when she would die. Happening to hear of your Actinoform, we thought we would try it and sent for a bottle, used it on her jaw three times, and now she is fat and just fine. It is a wonder, your Actinoform. I believe it will cure any case of lump jaw that is curable. We have more than half the bottle yet.—Mrs. L. C. Ransbottom, Bakersfield, Calif., Box 14.

Offered to Give Him Away.

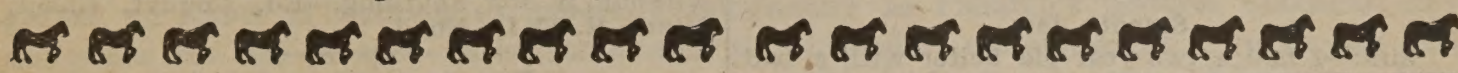

Dear Sirs:—I will take time to write you that the order of medicine we received from you last summer was very pleasing in its results on everything that we treated with it. We had a young steer that had the lump jaw and offered to give it away to any one who would take it off the place, but nobody would have it. We treated it with your Actinoform and would not take \$100 for him now. There is no sign of it coming back, and we still have some left from the one bottle.—Walter Jones, Golden Eagle, Ill.

Wouldn't Give a "Jitney."

Dear Sirs:—I know you like to hear what success your medicines give and will report. Last April I had a steer that developed lump jaw. I ordered a bottle of your Actinoform. The morning I gave it the first application, two cattle buyers came to look at some steers. The one with lump jaw was in the herd. One of them said, "I wouldn't give you a jitney for that fellow." I told him I did not want to sell him, I was going to cure him. They didn't say any-

Remember the Spavins, Ringbones and Fistulas

If you have a horse with spavin, ringbone, fistula or poll evil, you know that he isn't going to amount to much until he is cured, and now is the time to do the very best you can to fix him up. One doesn't know just how much time such cases may require, so it is best to make the start good and early.

thing, but just smiled. Last week we had a public sale and the lump jawed steer sold in the ring and there were only two men on the ground that knew he ever had the disease. "Nuf said."
—Harry McCalip, 2001 Main Street, Peoria, Ill.

Never Failed But Once.

Gentlemen:—I am sending you an order for your Spavin and Ringbone Paste. Hope it will do as good work as your Actinoform does. I have used it upon a good many head of cattle, and it has never failed but once.—John Kolash, Prescott, Iowa.

Smooth Jaw.

Sirs:—I had a two-year-old helper with a bad case of lump jaw. Two applications of your Actinoform completely cured her. She is now sound and well, with a smooth jaw and no sign of the disease.—C. P. Morton, Jackson, Mo., R. No. 4, Box 41.

Cured Steer and Cow.

Gentlemen:—Enclosed please find two dollars, for which send me one bottle of your Actinoform. I purchased from you about a year ago a bottle of this remedy and followed the directions in using it. It saved a very fine steer and cow. Please send my order out promptly, and use me for a reference if you desire.—Eugene C. Gatewood, Rectortown, Va.

Never Returned.

Dear Sirs:—Thanks for the Almanac for 1916. It reminded me that I had never written to you in regard to the remedies which I bought of you. I had a cow with the lump jaw. Seeing your advertisement, I sent for a bottle of your Actinoform. She had had it for about four or five months and it had broken when I got your remedy. It cured her and within three months you could only see a slight scab. She is now as well as ever and no signs of the disease have returned. It has been about two years since that happened. Your Hornstop is also just as advertised. I've stopped the horns on several calves with the tube I received.—C. Cunningham, Stittsville, Mich.

Does the Business.

Dear Sirs:—I enclose two dollars in post office money order for one bottle of Actinoform. I have used only one bottle and have cured four head, and I gave one of my neighbors enough for one cow. It is the medicine to do the business.—Aaron Michael, Chilly, Idaho.

Four and Some Left.

Gentlemen:—Enclosed find two dollars for which please send me a bottle of your Spavin Liquid. Last spring I bought a bottle of your Actinoform. I had three steers and one cow that had the lump jaw. I cured all of them with one bottle and have some left.—Ernest Grandt, Table Grove, Ill., R. No. 1.

Discharged Quarts of Matter.

Dear Sirs:—Three years ago I had a cow that had the lump jaw. She was so bad that the lump burst, and I really believe that there were quarts of matter discharged from it. I bought one bottle of your Actinoform and gave her two treatments. I then turned her out to pasture and in two months she was as sound as she ever was, and the hair had grown out naturally where the sore had been. I really believe that the two-dollar bottle of Actinoform was worth forty-five to fifty dollars to me.—C. R. Meredith, Kersey, Pa.

Bottle Cured Three.

Sirs:—Find order enclosed, for which send me one bottle of your Fistoform. I have a horse that has a hard lump on his poll, about the size of a hen egg, and I think it is poll evil developing. I have used one bottle of your Actinoform, and it cured three head.—C. S. Stephens, Wells-ville, Kans., Route No. 3.

Bottle Worth \$50.

Gentlemen:—Some time ago I sent for a bottle of your Actinoform, and that bottle was worth \$50 to me. I am now ordering a bottle of Spavin Liquid.—Frank Laplante, Red Lake Falls, Minn., R. No. 1, Box 63.

Bottle Cured Four.

Dear Sirs:—Please find enclosed two dollars, for which send me one bottle of Actinoform. I got a bottle last winter and cured one cow; then handed the rest of same to one of my neighbors, who cured three head with it. I would not be without it for anything.—Ed. Coquyt, Ghent, Minn., R. F. D. No. 1.

Two Applications Cured.

Dear Sirs:—Enclosed find one dollar, for which please send one package of your Tonic Heave Powders. I sent for a package some time ago, but did not need to use it, so let my neighbor have it. He says it is helping his horse and wants to get some more. I used your Actinoform with great success several years ago. Two applications of it cured a bad case.—O. B. Marlatt, Cameron, N. Y., R. F. D. No. 3.

Cured Five.

Dear Sirs:—Find enclosed two dollars, for which please send me your Actinoform. I sent for a bottle five years ago and cured five cows, two of which the veterinarian had failed to cure. I now have three cases on hand and would like to have the remedy at once.—Frank E. Russell, Ransom, Mich.

One Application Cured.

Gentlemen:—Enclosed find one dollar, for which send me Fleming's Colic Mixture. I used your Actinoform on a case of lump jaw and one application cured it. I think it does what you claim.—John Houston, Patoka, Ill., R. F. D. No. 2.

Bad Case.

Dear Sirs:—I was greatly pleased with a bottle of Actinoform purchased from you about four years ago. It cured a very bad case of lump jaw that had pus running out of it at several places. Enclosed you will find \$1.50, for which please send one bottle each of General Liniment and Veterinary Healing Oil.—Perry O. Adams, South Royalton, Vt., R. F. D. No. 3.

Looked Like The Picture.

Gentlemen:—I just received your Almanac for 1916, and would like to ask you for your Vest-Pocket Veterinary Adviser. I still have half a bottle of your Actinoform after curing a bad case on my cow. It looked just like the picture of lump jaw that I have seen in your Almanac.—Dalton Hinchman, Vernon, Ind.

Successful For Both.

Dear Sirs:—I ordered a bottle of your Actinoform some time ago and was more than pleased with it. It cured my cow, and I recommended it to a friend of mine who had a cow that had had lump jaw for a long time. He got some and it cured his cow too. I thought so much of it that I have decided to try your Hornstop.—O. H. Britt, Patoka, Ill.

Did It O. K.

Gentlemen:—The Actinoform that I got from you a short time ago has done the work. Just one application did it all O. K.—William Brown, Buffalolake, Minn., R. No. 3.

Results Gratifying.

Dear Sirs:—I have used two bottles of your Actinoform with gratifying results. I had about twelve head troubled with lump jaw, and your remedy has proved very beneficial. If you will send me your Vest-Pocket Veterinary Adviser, I will greatly appreciate the kindness.—A. B. Buckner, Holton, Kans.

Do Your Cows Have Garget?

Garget or caked bag in cows is a thing that should be given early attention, otherwise the animal may become worthless for dairy purposes. A description of this ailment, its usual causes, etc., will be found in Fleming's Veterinary Adviser. In the treatment of garget we know of nothing so generally satisfactory as Fleming's General Liniment, and directions for use in such cases come with it. Likewise, we guarantee it to be the best liniment for general, all-around use, and upon any kind of case that should be relieved by the application of a liniment. :: :: :: :: :: :: :: :: ::

Fistoform

Per bottle, \$2. See assortment offer on Inside of back cover.

Sent prepaid on receipt of amount.

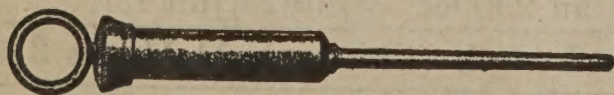

Fleming's Fistoform is for fistula of the withers and poll evil, which is fistula of the poll. It is also recommended for thrush in the foot, and for quittor, which is fistula of the foot, though these ailments do not appear to be very prevalent. All these diseases are described in Fleming's Vest-Pocket Veterinary Adviser, so descriptions need not be given here.

Nor is it necessary for us to say anything as to the merit of the treatment. That is sufficiently set forth in the letters that follow. When you read them, we think you will agree that nothing else has ever produced such results, especially if you are familiar with fistula and poll evil and know how ugly they are and how hard they usually are to cure by ordinary methods.

Though we want you to read these letters and learn what the Fistoform has done, we do not want you to believe that it will invariably do as well as these letters state. Cases seem to differ, and sometimes even those that appear comparatively mild may prove tedious, or may even have to be given up. However, as near as we are able to determine, failure has been reported to us in less than five per cent. of the cases treated.

We guarantee this treatment, but do not guarantee that one bottle will always be enough for a case, though by reading the testimonials you will see that in a large majority of the cases no more than one bottle is needed. Even if necessary to use several bottles upon a particularly obstinate case, the cost is trifling compared with the value of the result you are after, and if you fail the amount paid will be refunded. The idea is to persevere somewhat if necessary, but not to go to the extreme of perseverance without writing us the particulars.

Fleming's Fistula Syringe

Complete Syringe, by mail, 50 cents.
Extra Nozzles, each - 20 cents.

This syringe is very helpful in applying Fleming's Fistoform after a case has broken and is discharging. Ordinary syringes are so large as to be wasteful, or else the injection pipe is too short to be of any use. These

syringes are made especially for the purpose, and are constructed of hard rubber. We would not advise using a metal syringe. The capacity is small so that you can handle small quantities with it, and the nozzle or injection pipe is three inches in length. These are detachable and new ones can be supplied in case of breakage. The nozzles are the only extra parts that we can furnish.

Couldn't Work For Two Years.

Gentlemen:—I sent to you a few years ago and got a bottle of Fistoform and cured a horse that had a bad case of fistula and had been unable to work for over two years. By using your Fistoform, I had him sound and well in three months and doing hard work. I am now sending for a bottle of your Spavin and Ringbone Paste, as I have a mare with ringbone.—Robert A. Cox, Sikeston, Mo., R. No. 3, Box 73.

Doctored More Than a Year.

Gentlemen:—I want to write you a few lines about a horse that had a fistula. It was so bad that everybody who saw him thought that he could not be cured. We had the doctor one year and about three months; then we saw in the paper about Fleming's Fistoform and thought we would try that. We got one bottle and it helped; then we got the second bottle and used about two-thirds of it and the horse was healed. It has been about three years now and we have been using the horse almost every day.—Frank A. Heilman, Lehighton, Pa., R. F. D. No. 2, Box 14.

Eleven Pipes.

Dear Sirs:—A year ago I used your Fistoform for fistula on a mare that had been two years with the disease. Both sides of her withers were affected, extending from the top down between her shoulder blades. There were eleven pipes, it being one of the worst cases ever seen in this part of the country. She was practically worthless, but I thought I would experiment and see what your medicine would do. I sold her for \$125, and today she is sound, with only slight scars, which an ordinary observer would not see. One two-dollar bottle of the Fistoform did the job. I can recommend it as being one of the best remedies for fistula on the market.—Chas. D. Marble, Grulford, N. Y., R. F. D. No. 2.

Said Head Would Come Off.

Dear Sirs:—In the year 1914 my family driving mare took poll evil. She was about twelve inches across the top of the head, and people told me that her head would come off. I used different kinds of medicines and got no results, so I concluded that I would try Fleming's Fistoform. I sent two dollars and when the little bottle came, I said, "Stung again," but I used it as directed and half the bottle cured her. She has been well six months. I do not believe in telling a company these things until I wait and see if the trouble comes back, and I think six months is good enough. Her head is as smooth as any other horse's head. I have been offered \$163 for her, so I count that I gave you two dollars and received value to the amount of \$163.—Harry Bleavins, Leroy, Ill.

Worth \$175.

Dear Sirs:—I am glad to inform you that your Fistoform has worked wonders for me in curing a very bad case of poll evil. I had treated it all fall and winter, but it did no good. It was the worst case I ever tried, but less than one bottle of your Fistoform cured her sound, and she is now worth \$175 to me. I had bought the second bottle, thinking a case like that could not be cured with one bottle, and I had also been told that when a case had been treated with blue vitriol, it could not be cured with anything. That is surely a mistake, for I had used it all winter, and there had been other things used on her before I got her, but in spite of all that, the

How Are Your Horses This Spring?

As a general tonic and alterative or blood purifier for horses we do not know of anything to equal Fleming's Tonic Heave Powders. Just now there are more farm horses needing a tonic than at any other time of the year, and the work season isn't far ahead, even for the northern parts of the country. Fleming's Tonic Heave Powders are especially helpful when a horse is thin, hide-bound and the hair doesn't shed as it should. Your money back if they fail to give satisfaction. :: :: :: :: ::

Fistoform did the work in about six weeks, and she is now sound as a dollar.—R. H. Shanholtz, Merino, Colo.

Three Operations Failed.

Gentlemen:—I received from you in September a bottle of Fistoform. The case had been treated for six months, and during that time it had been operated on three times, and it appeared to get worse all the time. I must say that within a month from the time I started to use your medicine, I had the horse at work, and he has been doing the hardest kind of work since. I think that I owe you this letter, as I do not think I can say enough for your remedy.—James Sullivan, Little Valley, N. Y.

Two Doctors Failed.

Dear Sirs:—A number of years ago I used your Fistoform for poll evil on a valuable mare, and cured her so that she never had it again after two veterinarians had failed to do her any good.—J. A. Kuhn, Downing, Wis., Route No. 2.

Had Spent \$75.

Dear Sirs:—Please find enclosed five dollars, for which send us three bottles of Fistoform. We have used this remedy before and have had good luck with it. We had a big mare that had a bad fistula, and had spent \$75 with the veterinarians and doctored her nine months; then we saw your ad and sent for a bottle. It did not take all of a bottle to cure her. This gave us great faith in your medicines.—Thomas Pierce, Amorita, Okla.

Bottle Cured Two.

Gentlemen:—One year ago I ordered a bottle of your Fistoform. I had a three-year-old colt that had a fistula. A veterinarian treated it five months and it was no better than when he commenced. A very little of your medicine cured it. This fall a neighbor got a horse that had fistula and had been treated since spring. It had twelve openings. Six treatments with your Fistoform cured him. I cannot speak highly enough of your medicine. If I can be of any assistance to you at any time, let me know.—D. W. Badgley, Clayton, Mich.

Spent Over \$50.

Dear Sirs:—I had a case of fistula over two years old. In trying to find some one to cure it, I spent over fifty dollars. I got your Fistoform, followed the directions, and now my animal is sound and well. I would be pleased to receive a copy of your Veterinary Adviser.—B. E. Franklin, Mountain View, Okla.

Had Both Diseases.

Gentlemen:—I have a great lot of faith in your remedies. I cured a young mare of poll evil on her head and fistula on her withers. The doctor told me she was not worth the price of a bottle, but I tried it and was successful.—Mrs. Ida Bush, Walworth, N. Y., R. No. 2.

This Breaks the Record.

Dear Sirs:—Please send me a bottle of your Actinoform, for I have a heifer with lump jaw. Enclosed find money order for two dollars. I got a bottle of your Fistoform about six years ago, cured seven cases of poll evil with it and have some left.—Oscar C. Miller, Pekin, Ind., R. No. 12.

Bought Mare for \$2.50.

Gentlemen:—The medicine that I got of you last spring cured the mare of fistula of the withers. It had been running for over a year. I purchased this mare for \$2.50, as the farmer who owned her thought she was incurable. This mare is only seven years old and is as good a user as I ever had in the barn. Now you can hardly tell that she ever had fistula. She was all healed up and ready to go to work in about eight weeks. You can use this as a testimonial if you wish.—W. H. Thomas, Cable, Ohio.

Rotten to the Bone.

Gentlemen:—I am writing to thank you for the good work done by your Fistoform. In the summer of 1914 I had, and still have, this valuable mare, six years old. She had fistula on both sides, had nine openings, five on one side and four on the other, almost rotten to the bone. Pus would run all the way down to her feet. I tried several other remedies, but no good. Hearing of your Fistoform, I got two bottles and one of your syringes and made a permanent cure. I would have sent you these few words of thanks before now, but wanted to see how this case would turn out after working her. I have been working this mare since December, 1914, which is more than a year, and she is sound and all right. I would highly recommend Fleming's Fistoform to any one who may have a case of fistula or poll evil.—C. H. Schlack, Berryville, Va.

One of the Worst.

Gentlemen:—Nine or ten years ago I bought some of your fistula remedy for a young mare. Each year since I have read the testimonials in your Almanacs, and some of the cases seem to have been bad ones indeed, but it seems to me that my case was the worst of all. I got the young mare after the fistula was well under way. She had it on both sides and on the top of her neck where the collar rests. There were fourteen pipes in all and countless maggots squirming all over. The discharge ran down her sides and legs to the ground. Your remedy completely cured this case, and it certainly deserves praise.—George Hunt, Jr., Port Byron, Ill., R. F. D. No. 2.

Doctored Eleven Weeks.

Dear Sirs:—The Fistoform that I ordered from you did the work. I had a mule with the fistula and had a veterinarian doctor him eleven weeks without doing him any good. A bottle and a half of your Fistoform cured him. Thanks.—Benj. Kneeskern, St. Johnsville, N. Y., R. F. D.

Got Him for Nothing.

Dear Sirs:—About nine years ago I got a bottle of your Fistoform for a mare that had poll evil, and it cured her up in a very short time. About six years ago a neighbor had a horse that had fistula of the worst kind. I asked him why he did not cure it. He said that he had tried to cure it, but made up his mind that it could not be done and that he was going to shoot the horse. I told him that I had some of your remedy and that I thought it would cure it. He said he would not doctor it any more, but that he would give him to me if I thought I could cure him, so I took him home, but I found that I had a job on my hands. He had been doctored and cut into so much that I could not touch the fistula until I had petted him up for several days. I then started in to treat him, and in a couple of months you could hardly see a mark on him. It cured him up as sound as a dollar. He had it on both sides, and there was a hole clean through the withers. That was six years ago, and he has never had it since. I am now ordering another bottle for a neighbor who has a mare with fistula.—Robert Stratton, Curlew, Ia.

Cured Quittor.

Gentlemen:—The Fistoform that I got from you to treat a case of quittor worked to perfection. It took only three or four applications, and the horse is now sound and well.—F. G. Pence, Leonard, Mo., R. No. 1, Box 32.

Has Used It Thirteen Years.

Gentlemen:—Please find enclosed two dollars for a bottle of Fistoform. I have been using it thirteen years. Am now using from a bottle that has cured three other cases and a part of the fourth. It is the best thing I ever used. Send it at once.—J. D. Robinson, Watervally, Miss., R. F. D. No. 1.

Don't Sweeny Your Young Horses

Sweeny is most likely to develop in young horses that are starting in on their first season's work. Make sure that the collar fits properly, and remember that a green colt should not be expected to do the work of a seasoned horse. Plowing in stumpy or stony ground produces a good many cases of sweeny. No matter how careful you are, sweeny will sometimes show up, both in colts and older horses, without there being any apparent reason for it. Your money back if Fleming's Sweeny Blister should fail. :: ::

Sound For Twelve Years.

Gentlemen:—About twelve years ago I purchased a large gray mare, and after a few weeks, fistula developed. I had the best veterinary surgeon in western New York treat her all that summer, and she grew worse. I thought she was incurable and turned her into the pasture to see what rest would do for her. I happened to see your advertisement in a farm paper and sent for a bottle of your Fistoform. It completely cured her and there has never been a sign of it returning.—Ray E. Bucknam, East Bethany, N. Y.

Good Profit.

Dear Sirs:—Some time ago I ordered and used a bottle of your Fistoform on a four-year-old mare. This mare cost me \$25. Everybody except the veterinarian told me to knock her in the head with an ax. The doctor told me that it might take three years to cure her, and the result would be doubtful at that. I did the little thing in two months and cashed her for \$150. There were no scars. The hair grew out smooth. F. H. Snively, Newman, Calif.

Best on Earth.

Dear Sirs:—Enclosed find money order for a bottle of Fistoform. Please send as promptly as possible, as I am in need of it. I have cured several cases of fistula with it and have also cured lump jaw with your Actinoform. Some of these were cases that other veterinarians had given up. I must say that your remedies are the best on earth.—Joseph McCauley, V. S., Minonk, Ill.

Got Her For Almost Nothing.

Gentlemen:—I have a mare that had fistula so bad two years ago that I got her for almost nothing. I used your Fistoform and cured her completely. You can hardly see where it was, though when I got her she was just rotten on both shoulders. Have never seen anything of it since.—A. J. Anderson, Brockport, Pa., R. F. D. No. 1.

Bones Cut Out.

Gentlemen:—I thought I would write you about your Fistoform. I had a young horse that had the fistula, and he had been cut all to pieces and some of the bones had been cut out. I heard that Nat Sears had some of your Fistoform, and I went to see him and found that he had cured one case of fistula and had some of the medicine left. I got it from him and cured my horse and another besides. I recommend your medicine highly and will send you an order if ever I need anything in your line.—Wm. Barnett, Beech Hill, W. Va.

Had Taken Out Pipes.

Dear Sirs:—I got a bottle of Fistoform about a year ago and cured a fistula which was over a year old. This was a bad case. I had treated it with other medicines and had taken out several pipes, but did not cure it until I got your Fistoform. Enclosed find remittance for a bottle of your General Liniment.—George Bachman, Ronan, Mont.

Advised to Kill Her.

Dear Sirs:—I have used your Fistoform with good results. A good veterinary treated the case for several weeks without success; then a neighbor told me of your remedy. At that time it had gone for nearly a year. I decided to try it, and if there was no improvement, I thought I would kill her. She had seven openings in her withers, some of them connecting from side to side. She was skin and bones, and I was advised a number of times to kill her, as she was thought to be past hope. The second bottle of Fistoform cured her and she is now fat and as good as ever. I will recommend this remedy to any one having a case of fistula or poll evil.—W. D. Mann, Modesto, Calif., Route B, Box 373.

Had Been Cut Out.

Sirs:—I have long had it in mind to write you what your medicine did for a horse of mine. It was a very bad fistula, and she had had it for over a year. I had it cut out and everything else done that different veterinarians prescribed, and nothing did any good until we tried your remedy. I used only one bottle, and not quite all of that, as there was some left, which I let one of my neighbors have.—P. E. Thayer, Starring, N. H.

Worked Every Time.

Dear Sirs:—Over a year ago I sent for a bottle of your Fistoform and have cured two horses with it. Since then I have had several others try it and it has always done the work every time. I am now going to try your Tonic Heave Powders.—W. I. Taggart, Martinsville, Ill., Box 261.

Bad Poll Evil.

Dear Sirs:—After eighteen months I take pleasure in writing you of your Fistoform. In the fall of 1913 I came here as superintendent of Mr. J. N. Tilden's estate. At that time Mr. Tilden had a horse, one of a six-hundred-dollar team, under treatment for poll evil with a veterinarian at Peekskill. It had been treated for three or four months, but was all the time getting worse, so he decided to bring the horse back to the farm and shoot him. I had written to you regarding your remedies and I told Mr. Tilden that perhaps it might be worth while to give the Fistoform a trial. I sent you an order on Feb. 6, 1914, amounting to \$5.50, which included two bottles of Fistoform. I began to treat the horse on Feb. 21st. This was a very stubborn case, as there were two or three pipes on each side and a large swelling on the left side. By May 1st, after using a very little of the second bottle, the horse was entirely cured, and today, after a year and four months, you would never know that he ever had poll evil. The other remedies I have not had occasion to use, but am sure I will find them just as good as the Fistoform.—W. F. Tilton, Supt., J. N. Tilden Estate, Garrison-on-Hudson, N. Y.

Worth \$50.

Dear Sirs:—I have used your Fistoform with surprising success. I cured two fistulas with less than half a bottle. That bottle has been worth more than fifty dollars to me.—H. C. Phillips, Kirwin, Kans., R. F. D. No. 3.

No One Would Take Him.

Dear Sirs:—It has been nearly two years since I sent for your Fistoform. It cured my horse and I have been using him for over a year, and he is as sound as any horse can be. I wanted to give him away, but no one would take him, as he was broken out in four places at a time. He was as bad, I think, as they ever get. It took one and a half bottles to cure him. He is a horse that I can get \$200 for any day.—Geo. Herber, Dorrance, Kans., R. F. D. No. 3.

Was Pretty Rotten.

Dear Sirs:—I want to say a good word for your Fistoform. Two years ago I had a mare with fistula of the withers. I let the veterinarian doctor her for a long time and she got worse. She was pretty rotten when I sent for your medicine, but I used it according to directions, and in a few weeks she was cured as smooth as ever. People shook their heads and said it would be impossible to cure a case like that.—J. R. Fell, Topeka, Ind.

Doctor Gave Up.

Gentlemen:—I cured my horse of fistula and poll evil with one bottle of your Fistoform after the veterinarian had given up and advised me to give him away. I now value him at \$200. I can recommend your remedy.—W. F. Lowry, Ninety Six, S. C.

It is Worth While to Try

It may be that you have a case of fistula that you think is too bad to ever be cured. Perhaps it has been doctored a long time by the ordinary methods, and you have been told to shoot the horse. Don't do it until you have tried Fleming's Fistoform. Hundreds of just such cases have been cured with it. It doesn't cost much, even if you should have to use two or three bottles, and—your money back if it fails. :: :: ::

Poll Evil and Qilttor.

Dear Sirs:—Enclosed find money order, for which please send one bottle Fleming's General Liniment and a bottle of Veterinary Healing Oil. I have used your Fistoform for poll evil and qilttor, and both horses were entirely well in a few weeks, so we naturally have great faith in your remedies. —H. Henricksen, Imperial, Calif., R. No. 1, Box 54-A.

Two Bottles Cured Five.

Gentlemen:—Your Fistoform is the best thing I ever saw for fistula. I have bought two bottles of it from you, and with the two bottles I have cured five of the worst cases. One case had been running about fifteen months and I cured him sound and well after I had spent about \$15.00 on him with horse doctors. You can publish this if you want to.—W. M. Vaughn, Harrisburg, Ill., P. O. Box 313.

Pipes Three Feet Long.

Dear Sirs:—I am dropping you a few lines to let you know that I am well pleased with your Fistoform. It is just a little over a year since I cured a case of fistula on a mare of mine, which I thought would never heal up. I used every drop of two bottles and then was going to shoot her when the frost was out of the ground, so that I could bury her, but before the frost was out of the ground she healed up, which was about three weeks after I used the last of the Fistoform. I have worked her hard since and she has shown no signs of getting it again. This case was a bad one, for I could not reach the bottom of the pipe with a three-foot rubber tubing. I am sending for a box of your Tonic Heave Powders, not for heaves, but because it is good for horses which are run down.—Wm. Lang, Lake George, Mich., R. F. D. No. 1.

Took Him as a Gift.

Dear Sirs:—I wish to write and tell you of the good your medicines have done for me. I have been a user of them for about seven years and have always been satisfied with the results obtained, but most particularly with the results from your Fistoform. I will speak of one case in particular. An old gentleman had a two-year-old colt that had fistula in both shoulders and had had it for about six months. It was in bad condition, and he spoke of killing him, said he would never be any good, so finally he gave him to me. I used your Fistoform on him and in eight weeks his shoulders were perfectly sound. The medicine is many times worth its cost. If my letter will be of any help to you, you may publish it.—L. C. Hatcher, Goodes, Va.

Cost \$50; Worth \$175.

Dear Sirs:—I bought a bay mare for fifty dollars that had a fistula. I used about one bottle and a half of your Fistoform. She is cured and as sound as any mare now. I have been offered \$175 for her since she was cured.—P. L. Hart, Roxbury, Kans., R. No. 1.

Two Had Failed.

Dear Sirs:—Four years ago I used your Fistoform and cured a case of poll evil in five weeks that two veterinarians had failed on. It is all you advertise it to be, and I have recommended it to neighbors who have used it with equally good results.—John B. Earman, Harrisburg, Va., R. F. D. No. 2.

No Trouble Since.

Gentlemen:—I have just received your Almanac and am reminded that about four or five years ago I had a three-year-old mare that had the fistula, and I had a horse doctor to attend it, but without doing much good. It healed for about two months, then broke again on both sides worse than ever. I got a bottle of your Fistoform and a syringe and have cured her sound and well, and there was one-third of the bottle left. She sold for \$165, and has shown no signs of it since.—W. S. Carpenter, Quaker City, Ohio, R. F. D. No. 5.

Spavin and Ringbone Paste

Per bottle, \$2. See assortment offer on inside of back cover.

Sent prepaid on receipt of amount.

This picture may not look much like Bone Spavin, but it comes about as near to showing it as a picture can—at least it shows the approximate location.

Bone Spavin, Ringbone and Sidebone are the only blemishes to be treated with Fleming's Spavin and Ringbone Paste, and it is for the well developed cases causing marked lameness—even those that have been fired without success.

Put it on a spot no larger than the one shown here, and even smaller if the blemish is small. Let it stay 45 minutes, then remove it, and the one application is usually enough. Of course, we don't mean that the job will be finished in 45 minutes—it will likely be about six weeks before the horse is ready to go to work again. The directions tell you just what to do and how to do it, and we merely mention these points here to show how different the treatment is from any other used for the purpose—and we believe it as much better as it is different.

Do not try to treat the horse and work him at the same time. He must have rest in the stable.

We do not claim that Fleming's Spavin and Ringbone Paste will take off the enlargement, or help the appearance of the part in any way. Instead, it will destroy the hair upon the spot where the application is made, but a scar is better than lameness.

Fleming's Spavin Liquid does not scar if rightly used, but it is not intended for blemishes such as we have mentioned above, except when used just as the trouble is starting. It will often be successful in the older cases, especially when the animal is young, and if you have a fine horse and are particularly anxious to avoid a scar, we know of nothing else so likely to give you the result desired, but remember that we do not guarantee the Liquid for well established cases of Bone Spavin, Ringbone or Sidebone.

But Fleming's Spavin and Ringbone Paste is guaranteed to overcome the lameness in cases of the kind, and if it fails to do it you get your money back.

For information concerning the different

Heaves May Be Worse Now

Some horses with heaves are able to do a pretty good day's work until the hot weather comes on, then they can't stand it and have to be laid off. If you have a case that acts in that way, use Fleming's Tonic Heave Powders and you will likely find that the horse can work in comfort the summer through. Likely, too, the heaving will disappear completely; but, if not, the benefit derived and the extra work the horse is able to do will be worth many times the cost—otherwise, your money back.

kinds of blemishes and different forms of lameness, see Fleming's Vest-Pocket Veterinary Adviser.

Directions accompany every bottle.

Worth Nothing; Sold for \$200.

Dear Sirs:—I cured a young mare for my father some time ago that had been treated by two horse doctors for ringbone, but without effect. The animal had been under treatment at different times for two years. I got a bottle of your Spavin and Ringbone Paste, put on one application and cured her entirely. She was worth nothing as she was, but sold afterwards to one of our neighbors for nearly \$200. You couldn't buy her from him for that now.—Tom M. Simonson, Rolfe, Iowa, R. F. D. No. 3, Box 25.

Made \$100.

Dear Sirs:—Please send me your Vest-Pocket Veterinary Adviser. I have a bottle of your Colic Mixture in the house that I have had for two years, but have never opened it as I had no colic, but I know its worth and would not be without it. The Spavin and Ringbone Paste made me one hundred dollars, as I had a mare that I paid \$25 for and sold her for \$125 after she was cured. I used only one application.—G. A. Judd, Kingsley, Mich., R. No. 1.

Lame Five Years.

Gentlemen:—I had a horse with a ringbone, and that ringbone had crippled my horse for five years. One day a friend asked me if I had used Fleming's Spavin and Ringbone Paste. I hadn't, so I bought one bottle and used it on him only once, and he is in the collar today and as sound as can be.—W. W. Klossner, Iona, Idaho.

Said It Couldn't Be Cured.

Gentlemen:—Please send me a copy of your Almanac. I just cured a horse of ringbone with your Spavin and Ringbone Paste that the veterinarian said couldn't be cured.—Ira O. Harold, Clinton, Ill., R. No. 5.

Looked Little.

Gentlemen:—I got some of your Spavin and Ringbone Paste, and it sure did the work. My mule is as well as a colt, and I would not take \$200 for her. The bottle looked mighty little, but it is worth its weight in gold. You may put this in your Almanac if you want to, as it may help some one else.—Sam Gilbert, Lebanon, Va., R. No. 1.

Let Firing Irons Rust.

Gentlemen:—Please send me for the enclosed draft one bottle of your Spavin and Ringbone Paste. Every V. S. should try out this remedy, and I know by experience that they will let their firing irons rust out if they do.—C. B. Reynolds, D. V. S., Faulkton, S. Dak.

Ringbone on Every Foot.

Gentlemen:—I have used your Spavin and Ringbone Paste and found it just what you claim. It cured a horse that had ringbone on all four feet. Had sent two different times to you for the Paste for other people. They will come here to me to cure a horse for them. I tell them that I do not cure the horses and that they can send to the same place that I did, and get the same results by using the Paste according to directions. The horse that I cured is here in the neighborhood, and any one can go to see for himself and need not take my word for what the Paste has done. I am sending you with this letter a money order for a package of the Paste, which is for another man.—O. L. Grigson, Bradford, Ky., R. No. 1.

Hadn't Worked in Three Years.

Dear Sirs:—Enclosed please find two dollars for which send me one bottle of Fleming's Spavin and Ringbone Paste. I have cured three

ringbones with one bottle. One was a mare which had not been worked for three years, and is being driven to a buggy today.—R. C. Hawthorne, 1001 N. Queen St., Martinsburg, W. Va.

Isn't Doing At All.

Gentlemen:—I will take pleasure in writing you and telling you how the ringbone is doing. It isn't doing at all; it is dead. I say your Spavin and Ringbone Paste is the best medicine in the world. I want you to send me another Veterinary Adviser, as I lost the one I had.—G. L. Smith, Dwarf, Ky.

Cured 39 Cases.

Dear Sirs:—I must state that I have cured thirty-one bone spavins and eight ringbones with your Spavin and Ringbone Paste. I think there is nothing like it.—Severt Larsen, Larsen, Wis., R. No. 14.

Had It Eight or Nine Years.

Dear Sirs:—About a year ago I got a bottle of your Spavin and Ringbone Paste. I used it on two horses that had bone spavin. One had had the spavin for eight or nine years, and I had used all kinds of remedies, but didn't do any good. Your Paste did the work. The other one had spavin about three years which the doctor treated, but did no good. Last winter I used your Paste on her and now she is cured. Please send me your Vest-Pocket Veterinary Adviser. I gave my old book to my brother-in-law.—August Peters, Clear Lake, Minn.

Not Worth \$15.

Dear Sirs:—I have used your Spavin and Ringbone Paste on a mare that was so lame that she was not fit to work at all. Her owner said she was not worth \$15. He now works her all the time. She is sound and well, and he has been offered \$160 for her.—G. H. Duncan, Lewisburg, Ky., R. No. 1, Box 31.

They All Failed.

Gentlemen:—Two years ago I bought a fine horse at a sale. He had a very bad case of ringbone. He had been fired and had been doctored by several different veterinarians. They all failed. I sent and got a package of your Spavin and Ringbone Paste, and he is sound and well and is a good horse now, so I believe in your remedies.—F. M. Shelton, Hanson, Ky., R. No. 1.

Three Ringbones and Some Left.

Dear Sirs:—About two years ago I got a bottle of Spavin and Ringbone Paste, and it did the work all right. I killed three ringbones and have some left. I am sending you an order for a bottle of Fistoform and a Fistula Syringe. Find \$2.50 enclosed.—R. H. West, Lynxville, Wis., Box 115.

Had It Five Years.

Dear Sirs:—I received your Almanac today and wish to thank you for the same. Two years ago I used some of your Spavin and Ringbone Paste on a horse that had had a spavin for five or six years. I had used everything else without any help, but one application of the Paste cured him. I have some of it left and wish to use it on a mare with ringbone on each fore foot, but I have lost the directions. Will you please send me a Veterinarian Adviser and directions for treating the ringbones?—Frank Brown, Brooklyn (Station of Cleveland), Ohio, R. F. D. No. 1.

Couldn't Get to Water.

Dear Sirs:—I have a saddle horse that had ringbone on both fore feet, and he could not go to water. I cured him, and he is just as though he never had ringbone. Last year one of my best work horses had a ringbone on his left front foot. I cured him in good shape, but through heavy pulling he now has ringbone on the right front foot. Enclosed find money order for two dollars for a bottle of the Spavin and

The Thing Most Likely To Be Needed

A good liniment is probably more often needed than any other kind of remedy. If you have no need for Fleming's General Liniment now, you likely will have before long, and it might be well to procure a bottle and have it ready. There are liniments that cost less, but a cheap liniment must be made of cheap ingredients. There are also liniments that cost more, but we do not know how they could be better than Fleming's. :: ::

Ringbone Paste, as I have to cure that. I know it will be an easy matter.—Theo. Storff, Aura, Nev.

Doctor Said Kill Him.

Gentlemen:—Please find enclosed one dollar for which send me one package of your Tonic Heave Powders. I have not used these powders, but I have used your Spavin and Ringbone Paste and know it cannot be beat. In 1914 I had a horse that had a ringbone on his hind foot. Our local veterinarian treated this horse all one summer, but did no good. The horse grew worse, and he told me to kill him. He was so lame that he could not walk at all, but thanks to your Paste he is a sound horse today. I cannot speak too highly of it. I paid the veterinarian \$40, then \$2 did the trick.—Burt Campbell, North Street, Mich., R. No. 1, Box 121.

Only Thing That Was Any Good.

Dear Sirs:—Enclosed please find one dollar for your Sweeny Blister. I have tried your Spavin and Ringbone Paste, and it is the only medicine I ever did try for ringbone that was any good.—Allen Morehouse, Osseo, Minn.

Got Fooled.

Dear Sirs:—I will write and tell you how badly I was fooled with your Spavin and Ringbone Paste. About four years ago I sent for a package of it for my driving mare, and I used one application and thought it was worse than before. I traded her off and the man went to Kansas and drove her there. About three weeks ago his boy came back and told me that he still had the mare and she was well and all right.—Calvin P. Miller, 108 E. Bridge St., Danville, Ill.

Sound Seven Years.

Dear Sirs:—Having used your Spavin and Ringbone Paste on a horse that everything else had failed to help, one application of the Paste made him serviceably sound. I have used him every day on the farm since using the Paste seven years ago. It was the worst case of bone spavin I ever saw. He was so lame that I did not use him for a year before using the Paste. In two months' time after treating him, I put him at work again and have used him every day that I needed a horse at farm work since.—Thos. Fitzmorris, East Bloomfield, N. Y., R. F. D. No. 1.

Firing Failed.

Gentlemen:—I used your Spavin and Ringbone Paste some eight years ago. I bought a mare that was called good for nothing. She had been doctored for spavin all summer and was still lame. I gave five dollars to have her fired and that did no good, then I bought your Spavin and Ringbone Paste and gave it one application, and she has been all right ever since. I then let a neighbor have it, and when he had used it with satisfaction he passed it on to another, and so on until it had cured a half dozen or more bone spavins and one ringbone, so you see that was two dollars well spent.—J. C. Chamberlain, Leonard, Mich., R. F. D. No. 1.

Doctors Had Failed.

Dear Sirs:—Two years ago I sent to you for your Spavin and Ringbone Paste, as we had a horse that had spavin and a very bad one. He had had it for years, and it had been doctored by home veterinarians for a long time, but it only grew larger. I used the Paste just as you directed. It took about three months, but it was a cure, and the horse has been all right ever since. I also gave some of the Paste to a neighbor and he cured his horse. Please accept my thanks for what it has done for us.—Mrs. S. J. Cole, Livonia, N. Y., R. F. D. No. 2.

Told To Kill Him.

Gentlemen:—Find enclosed two dollars for which please send me your Spavin Liquid for thoroughpin. I had a horse with sidebone, and

he was so lame that my neighbors told me I had better kill him. I tried your Spavin and Ringbone Paste, and in a few months he stopped limping and has not been lame since, which has been two or three years.—D. W. Ford, 1015 Washington St., Whitman, Mass.

Drives Thirty Miles a Day.

Gentlemen:—I have used nearly all the different preparations you manufacture, and all have astonished me and my friends. Some of the ugliest bone spavins yielded, and the horses lost their lameness, never to return. Nine years ago I treated a little gray mare for a livery man. She had a very large bone spavin and was then five years old. She has done livery work ever since. Our mail carrier passes our house daily by motor cycle, but in mud and snow he drives the gray mare thirty miles a day, and she never favors the spavined leg.—F. A. Huebner, Manitowoc, Wis., R. F. D. No. 7, Box 146.

Cured Eleven.

Gentlemen:—In 1906 I bought a mare five years old for \$75. She was badly spavined. I tried various remedies without success, then I saw your Spavin and Ringbone Paste advertised and wrote for your Vest-Pocket Veterinary Adviser, after which I ordered a bottle of the Paste and cured this mare and ten more with the same bottle. Please send me another Veterinary Adviser.—F. L. Stewart, Needmore, Ga.

Had Ringbone Five Years.

Dear Sirs:—I am ordering a bottle each of your Sweeny Blister and General Liniment, also a package of Tonic Heave Powders. I tried your Spavin and Ringbone Paste last fall and cured a horse of ringbone, which had bothered him for five years, and one application fixed it.—Geo. S. Dalgetty, Simpson, Colo.

Had Two Ringbones.

Gentlemen:—Enclosed find one dollar for which please send me a package of your Tonic Heave Powders. I cured a horse that was practically worthless with your Spavin and Ringbone Paste. He had ringbone on both front feet. I also cured a case of strained tendons with one of your other remedies, so I have lots of faith in them.—A. M. Draper, Arlington, Iowa, R. F. D. No. 1.

Had To Apply Twice.

Dear Sirs:—About three years ago I bought a bottle of your Spavin and Ringbone Paste for a case of bone spavin. I had to apply it the second time, but I got the result and the horse never had a lame day since. You will find order for two dollars enclosed, for which please send me a bottle of Spavin Liquid, which I wish to use in treating a curb.—W. J. Burkett, St. Louis, Mich., Route No. 2.

Sure Shot.

Dear Sirs:—Will you please send me your Vest-Pocket Veterinary Adviser? I had one, but lost it. I can't get along without it. I have used your Spavin and Ringbone Paste on a number of cases with a cure in every case. It has been a sure shot every time.—Fred Kinkead, 413 Locust St., West Plains, Mo.

Too Lame To Drive.

Dear Sirs:—Several years ago I bought a bottle of your Spavin and Ringbone Paste and used it on a mare for ringbone of two years' standing. This mare was so lame that I did not drive her after December. I made one application, which was March 18th, and by July 1st she was all well and never limped from the ringbone afterwards, although I kept her about three years. I gave the ringbone no other treatment, just a 45-minute application, according to the directions.—Geo. Staplin, Jr., P. M., Mannsville, N. Y.

Don't Let the Lumps Go Too Long

This is a busy season, but don't forget to inspect your herd occasionally to see whether any lump jaws are developing. If you find any, don't put off treatment on account of other work. Generally speaking, the earlier you begin the easier cured, and it doesn't take much time anyway to use Fleming's Actinoform. You don't have to apply it every day, but only about once in ten days or two weeks, and if you catch the case at the very start a single application is likely to be enough. :: :: :: :: :: :: ::

Spavin Liquid

Per bottle, \$2. See assortment offer on inside of back cover.

Sent prepaid on receipt of amount.

This preparation is in liquid form, but it is not a liniment. If used like a liniment, you would be using too much. The directions will make that plain.

Broadly speaking, Fleming's Spavin Liquid is used upon all blemishes except such as we advise treating with the Spavin and Ringbone Paste. In order that you may more clearly understand what to use it for and what to expect it to do, we will give brief mention to the principal kinds of cases for which it affords a suitable treatment.

Bog Spavin.—If the horse is lame or shows signs of weakness in the part, treat the case, using Fleming's Spavin Liquid. It will usually overcome the lameness and is likely to take away the enlargement. If there is no lameness, the bunch is apt to be obstinate, and its removal more doubtful than in cases where lameness is present. We think that treatment is successful in only about 75 per cent. of such cases, so unless the bunch seems to be increasing, we do not urge attempting to remove it, and especially if the horse is of the large-boned type.

Bog spavin and similar puffy enlargements sometimes appear upon the hocks of young colts. Usually in these cases there is no lameness and we advise letting them alone, as they often disappear of their own accord as the animal attains its growth. However, if you consider it desirable to treat the case, you may apply Fleming's General Liniment lightly about once a week or ten days.

Some confuse bog spavin and blood spavin. Blood spavin is merely a dilation of the vein crossing the part. It is both harmless and incurable.

Thoroughpin.—This is practically the same in character as bog spavin, but differently situated. What is said in reference to treating bog spavin applies to thoroughpin also.

Capped Hock.—Treat only the recent cases and those causing lameness. An old case that is not troublesome should be left alone, as there is but slight chance that such a blemish can be removed.

Splint.—What is said about capped hock applies to splint as well. After taking on a hard, bony character, the blemish is permanent, and if the horse is not lame, there is nothing to be gained by treatment.

Curb.—The same is true of curb. Treat only the new cases, and those of the old ones that are giving trouble.

Wind Gall.—These blemishes are nearly always harmless. They can sometimes be removed, but treating for this result is uncertain, so we do not urge it. If they cause lameness, treat them, using Fleming's Spavin Liquid.

Stifle Lameness.—Allow rest and use Fleming's Spavin Liquid on a small spot over the affected part, repeating on different spots at intervals of ten days or two weeks. This has

been very successful in cases of the kind. In mild and recent cases, Fleming's General Liniment is likely to prove sufficient, but it is not recommended for the old and chronic cases.

Recent Bone Spavin.—If you catch a bone or "jack" spavin in the very beginning, and especially if the animal is young, Fleming's Spavin Liquid should prove sufficiently active to overcome the lameness or "kill it," and it has the advantage of producing no mark or scar. But notice that we say RECENT cases—we do not claim that it will produce such results where the blemish has become well established. It does frequently stop the lameness in the older cases, and if you happen to have the remedy on hand it is well to give it a trial. But if you are ordering a remedy to treat bone spavin that has been observed for six months or so and is causing marked lameness, get Fleming's Spavin and Ringbone Paste. Let bone spavin alone altogether if there are no signs of lameness.

Recent Ringbone.—Where ringbone is just beginning to lame a young horse, use Fleming's Spavin Liquid, especially if you wish to avoid a scar. The bunch cannot be reduced except in a few of the most recent cases. Where the case is somewhat advanced the Spavin and Ringbone Paste will be required, but do not treat with the Paste unless there is marked lameness.

Recent Sidebone.—What we have said about ringbone will apply to sidebone also, which is much the same and requires the same treatment.

Fleming's Spavin Liquid does not scar the horse. It blisters, but the hair grows in again when the part is healed.

We guarantee it to the extent of the claims we make for it, and refund the money if it fails. We refer you to Fleming's Vest-Pocket Veterinary Adviser for illustrations and descriptions of different kinds of blemishes and forms of lameness.

Directions accompany every bottle.

Worth a Hundred More.

Gentlemen:—I have been using your Spavin Liquid. Six months ago this mare was worth \$50. Now she is worth \$150, if the improvement is permanent. She gives a little yet when we turn her out, and she starts on a jump. When I sent for the treatment, the people made fun of me and said that another sucker had bit. When the mare ceased limping, they said it was a good thing that suckers bite sometimes.—I. J. Brand, Columbus, Ind.

Can't Be Beat.

Gentlemen:—Please find enclosed two dollars, for which send me one bottle of your Spavin and Ringbone Paste, as I have a horse that has bone spavin. He has had it since last October and is very lame. I sent to you for a bottle of Spavin Liquid about ten years ago and cured three bad cases. It can't be beat, but this case is one that calls for the Spavin and Ringbone Paste.—Ollie Newton, Reynolds Station, Ky., R. F. D. No. 2, Box 36.

Proved Wonderful.

Dear Sirs:—The Spavin Liquid that I procured from you two or three years ago proved wonderful. It entirely cured the case and changed a worthless animal into a valuable one.—A. M. Ritchey, Monkland, Ore.

Has Kept It Eight Years.

Dear Sirs:—Enclosed find money order for two dollars. Please send me your Spavin and Ringbone Paste. I got your Spavin Liquid about eight years ago. I have cured several blemishes of various kinds and still have half a bottle left. Also send me one of your Veterinary Advisers.—W. H. Johnson, Radisson, Wis.

A Big and Unnecessary Loss

How many horses die every year for lack of Fleming's Colic Mixture? We do not know, but surely a good many. The great trouble is that so few horse owners will take thought to provide in advance of the actual need. The few that do save their horses, as you will see by reading the testimonials. The others take a chance, and when colic comes they have to hustle around for whatever help may be available. Fleming's Colic Mixture costs only a dollar, and we think it comes nearest to never failing of any remedy that we have.

Can Recommend It.

Dear Sirs:—I have tried your Spavin Liquid on my horse and it did the work all right. I can recommend it to cure any horse with a bog spavin. I let her stand while using the remedy; then drove to town, letting her walk all the way and back again. I then drove three miles on Sunday, when she limped only just a little.—John W. Cutting, Fox, Ill.

Collar Boil.

Gentlemen:—Enclosed find one dollar for a package of your Tonic Heave Powders. Your Spavin Liquid we have used on collar boils and it has removed them clean.—Collinwood Express Co., J. S. Bothwell, Collinwood, Ohio.

Twenty-four and Good Yet.

Dear Sirs:—Eight years ago our horse Nellie had spavin. An old foggie said it was blood spavin and that there was no cure for her. He told us to trade or sell her, but my daughter, Mary DeLong, said: "I'll get Fleming's Spavin Liquid." She did and it cured her. Later she got a bad swelling on the shoulder. We used the Liquid and it again cured her. She is twenty-four years old and a good horse yet.—Mrs. Lydia Brion, Okome, Pa., Box 7.

Sure He Was Stuck.

Dear Sirs:—I have used your Spavin Liquid and it seemingly has proven a success. A friend of mine gave me a horse, quite a nice looking fellow, eight or nine years old, with a very large thoroughpin. I was sure I was stuck, even if he was given to me. I used your Spavin Liquid and kept him quiet for about four weeks, and, to my surprise, the lameness left. I let him slip out of the stable on me, and the way he tore up the mud in the barnyard was a sight. I was sure he would be lame the next morning, but it did not seem to hurt him.—A. T. Burkley, Baldwin City, Kans.

Lame Mule.

Dear Sirs:—I know your Spavin Liquid is just what you recommend it to be, as I cured a mule that was so lame he could hardly walk, and I had enough left to cure my neighbor's mare.—Everett Hughey, Alexander, N. C., R. F. D. No. 2.

Best Deal He Ever Made.

Gentlemen:—The best money I ever made was when I traded for a horse three years old with thoroughpin. He was very lame. I treated him with your Spavin Liquid, cured him without a blemish and made a very fine \$125 horse of him.—Ben Walden, Gosport, Ind., R. R. No. 3.

Passed It Around.

Dear Sirs:—That Spavin Liquid I got from you proved satisfactory. My mare had sidebone starting and one application cured her. My neighbor had a horse with spavin and it cured that. His friend had a horse with spavin, and it cured that also. Another man got a horse with a bunch on his knee and he has the medicine now. I am sure it will be cured, and all with one bottle.—Karl Munsch, Fredonia, N. D.

Always Cured So Far.

Gentlemen:—I have tried your Spavin Liquid on thoroughpin and also for other troubles, and found it to be O. K. It has cured everything I have used it for so far.—W. J. Hickman, Tabor, N. C.

Bad Bog.

Dear Sirs:—Something more than a year ago I bought a bottle of your Spavin Liquid, which I used with very satisfactory results on a mare that had rather a bad case of bog spavin. I re-

member you told me that you thought the enlargement would not be removed in this case, but that the lameness would be entirely cured. Well, it turned out just as you said it would. She entirely recovered of the lameness, but the enlargement remains.—C. P. Thornhill, Columbia, La.

Had Tried For Five Years.

Dear Sirs:—Three years ago I sent for a bottle of your Spavin Liquid. I used it on a thirteen-year-old mare that had bog spavin and thoroughpin, upon which I had tried all sorts of things for two years. I applied the Liquid and did not use the mare again that winter. In the spring she was as good as new, but later she had a bad splint, so I laid her off and treated her, and now she can go faster and stand more than ever before. Money won't buy her.—R. W. Stowe, Bristol, Vt.

Bog and Thoroughpin.

Dear Sirs:—About four years ago I had a colt three years old that had bog spavin and thoroughpin. The knot was nearly as large as my fist, and he was so lame that I could not use him. I got from you one bottle of Spavin Liquid and used it. He immediately got well of the lameness and I put him to work and have been using him ever since. The knot has almost disappeared. I have cured several cases with the same bottle and have some left. I consider it the greatest medicine I ever saw.—H. M. Tolson, Commissioner of Revenue, District 2, Stafford Store, Va.

Curb.

Gentlemen:—I got a bottle of your Spavin Liquid some time ago and used it on a curb with good success. It stopped the lameness and took the bunch away, which I thought was very good.—Otto Fundinger, Van Meter, Iowa, R. No. 1.

Recent Bone Spavin.

Gentlemen:—I cured a mare of recent bone spavin in both legs with your Spavin Liquid. Used only one application for each leg. Use this if it will benefit you.—C. E. Young, Fairfield, Ill., R. R. No. 6.

Four Bogs and a Curb.

Gentlemen:—Enclosed find money order for three dollars, for which please send me two packages of your Tonic Heave Powders and one bottle of Colic Mixture. I bought a bottle of your Spavin Liquid about three years ago and have cured four bog spavins and a curb and have half the bottle left. It sure is some medicine.—James J. Markle, State College, Pa.

Shoe Boil.

Gentlemen:—I find your Spavin Liquid excellent for shoe boil; not a failure in five cases.—L. Wahl, V. S., 1011 Marshall St., Boone, Iowa.

A Successful Veterinarian.

Dear Sirs:—Please find enclosed money for one bottle of Spavin Liquid. I am sixty years old and have always had a large practice. I have been trying to retire for the last three years, but they press me in the practice more than ever, so I will have to continue or give up and move, and I won't do that. I have an envied reputation as a veterinarian, and will say that I got it by using your remedies. I just knocked bog and bone spavin. Never made a failure yet. Many thanks for the remedies you put up and the kind treatment at your hands.—A. W. Sharp, D. V. S., Southwest City, Mo., R. F. D. No. 1.

Read Inside of Back Cover When Ordering

When making up an order, don't overlook the "Assortment Offer" at the top of the price list. Some send five-dollar orders and specify only five dollars' worth of remedies, and we have to write telling them that they are entitled to a six-dollar lot, and asking what more we shall send. Also read the "Points for Special Notice" in the left-hand column of the same page.

Tonic Heave Powders

Sent prepaid for \$1.

See assortment offer on inside of back cover.

If you have a horse that needs something in the way of a tonic and blood purifier, give him Fleming's Tonic Heave Powders.

That may seem odd, considering that he hasn't the heaves, but the explanation is that the only reason it cures heaves is because it is so good as a general tonic and alterative.

It is pretty generally considered that heaves proper is not a disease of the lungs, but rather a reflex nervous disorder, usually arising from digestive derangement. This explains why overfeeding, drinking too copiously of cold water, etc., so often tends to aggravate the heaving.

Broadly speaking, a tonic is a remedy that tends to correct trouble wherever it exists. This is done by gradually and permanently improving digestion and assimilation, and imparting strength and tone to the whole system. It is clearly seen, therefore, why a tonic remedy may be expected to do the most for heaves.

It would be wrong to say that all cases of heaves are curable. We offer this preparation, not as a certain cure, but as the best we are able to supply, and, as we believe, the best treatment for heaves that has ever been prepared.

Cases vary. Some are more easily overcome than others, regardless of how bad they seem to be or how long they have existed. The usual quantity required is one to three packages. Even if no improvement is seen from the first package, it is well to use a second, as our experience shows that many cases are slow to yield at first, but come out all right in the end. It is not to be supposed that we guarantee one package to be enough, or that we will send extra packages on trial. Where a mare having heaves is in foal, the treatment is not so likely to be successful, and we advise deferring it until after foaling time.

Do not use Fleming's Tonic Heave Powders with a view to quickly and temporarily suppressing the symptoms in order to make a trade. It acts slowly and is calculated to do lasting good, instead of temporarily covering up the symptoms.

Read the testimonials. They tell best what Fleming's Tonic Heave Powders do, and if you use this preparation without at least sufficient benefit to justify the purchase, the money will be refunded to you.

For more complete information upon heaves, and also other respiratory affections, see Fleming's Vest-Pocket Veterinary Adviser.

When a Horse Needs a Tonic

A horse may need a tonic at any season of the year, but among farm horses a remedy of this kind is more likely to be needed in the early spring than at any other time.

The long continued chill of winter, with irregular exercise or almost none at all, eating dry and bulky food, which is often of a kind that is more or less indigestible as well as low in nourishing properties, drinking icy water, etc., tends to create a state of general sluggishness and low vitality. The processes of digestion, assimilation and elimination become impaired, the blood becomes impure, the pores closed, the skin scurfy and sometimes tightly drawn over the ribs, the hair stands on end and does not shed, and the horse remains thin whether his appetite is good or bad.

In a condition such as this we know of nothing in the way of a tonic and blood purifier so satisfactory as Fleming's Tonic Heave Powders, and it is economical to use because a package goes so far. Use it also for coughs, skin eruptions, etc. We do not claim that it will always be successful, but it is an excellent general remedy for many of the common ailments among horses.

Your money refunded if the result is not such as to please you.

Directions accompany every package.

Thought Them Worthless.

Dear Sirs:—Two years ago I got two packages of your Tonic Heave Powders. I had two horses with the heaves. I thought they were worthless. Your Heave Powders cured them, and I would not sell them for \$800. I think these powders are great. I recommended them to my father, Geo. B. Cozino. He got some and told me that they could not be beat.—Cornelius D. Cozino, Wilmington, Vt.

Offered for a Dollar.

Dear Sirs:—I bought a package of your Tonic Heave Powders six years ago for a young mare that I had offered to sell for one dollar. I gave the powders to her and am working her today.—W. J. Oringderff, Denver, Ark.

Put Them in Shape for Work.

Dear Sirs:—Enclosed find one dollar for which please send me one package of your Tonic Heave Powders. They are certainly better than any condition powders I have ever used. Last spring all my horses had distemper, just a few weeks before spring work commenced. They were sure a sorrowful looking bunch when I started to work them, but I began feeding the Tonic Heave Powders and they gained in flesh and went into their work as if nothing had been wrong with them.—H. J. Gross, Tracy, Minn.

Sound as Ever.

Gentlemen:—I got a package of your Tonic Heave Powders last spring. I had a horse so bad with the heaves he could not trot three miles. I gave him one box and he is as sound as ever. I told several of my neighbors about it and gave your address to Phillip Proffits. He is going to order.—Chas. C. Moorhead, Stanton, Nebr., R. No. 3.

Poor Horse Gets Fat.

Gentlemen:—You will find enclosed one dollar, for which please send me a box of your Tonic Heave Powders at once. I have tried this won-

Get After The Spavins and Ringbones Now

There are a good many horses that have had to do more or less work through the busy season, in spite of spavins and ringbones. From this time on the greater number of them can be given plenty of rest, so this is the opportunity to give them the needed treatment. It is necessary to give rest if you are to accomplish any real good in a case of the kind, and we never advise using Fleming's Spavin and Ringbone Paste under any other conditions. Don't put it off—that might mean not doing it at all, and another season of lameness.

derful tonic, and it is the best that I have ever seen. It sure did the work for me. I had an old, poor horse, gave him the powders, and he got fat.—P. W. Williams, Hanceville, Ala., R. F. D. No. 3.

Said He Would Die.

Gentlemen:—I thought I would write you to say that your Tonic Heave Powders are one of the finest things I ever used. My horse was so bad that he could not go uphill more than a hundred feet at a time without resting, and everybody said that he would die, but he is now fine as silk. I say myself that I have had bad cases of heaves, but this one was the worst I ever had. He can kick and jump like a colt, but was only skin and bones when I got him.—H. P. Duffield, Chloe, W. Va.

Equally Good as a Tonic.

Dear Sirs:—Enclosed find three dollars, for which send three boxes of Fleming's Tonic Heave Powders. I am greatly pleased with these powders. Two boxes cured a mare for me and left her in fine condition. It is equally as good a tonic as it is for heaves. I am ordering two of these boxes for my neighbor, and am sure he would appreciate a copy of your Veterinary Adviser, the same as you sent me.—Edward Erickson, Mt. Horeb, Wis., R. No. 6.

Three Cases.

Dear Sirs:—I have tried your Tonic Heave Powders and found them O. K. on three cases, one box each. It is all you claim it to be.—T. B. Whitley, Cleveland, N. Car., R. No. 2.

Sound as a Colt.

Dear Sirs:—I am going to give your Tonic Heave Powders credit for what they have done for me. I had a horse that had the heaves for eighteen months. I tried everything for him and did no good; then I met a man who had tried your powders and advised me to get a box. I used just one dollar's worth and my horse is as sound as a colt that never had anything the matter with him. Enclosed find one dollar, for which send me one bottle of your Sweeny Blister.—John B. Cannon, Hillman, Mich., R. F. D. No. 2.

Cured Bad Case.

Dear Sirs:—Enclosed you will find money order for one dollar, for which please send me a box of Tonic Heave Powders. I ordered a box of your powders about eighteen months ago, which cured a bad case of heaves on my mother's mare.—M. L. Needham, Rutherford, Tenn., R. No. 2.

Old Horse Brings Good Price.

Dear Sirs:—Please find enclosed money order for two dollars, for which send me one bottle of Actiniform. I sold my seventeen-year-old horse three years ago for \$150 after your Tonic Heave Powders had brought back his wind. The cure was complete. Please note my change of address and do not confuse my new address with the one you have.—Jas. Kirk, Hastings, Mich., R. No. 3.

A Joke on the Jockey.

Gentlemen:—Enclosed find one dollar for a package of Tonic Heave Powders. I never took so much pleasure sending any one money as I do you people. I bought a big mare, apparently sound and all right, of a professional jockey, but she was doped. I thought there must be something the matter, as I paid only \$75, and I soon found out. Now we haul the biggest loads of anybody around here, and you ought to see that jockey look at her, but I look wise and say nothing.—R. B. Jaquith, Ludlow, Vt.

Feeds Less Grain.

Gentlemen:—Enclosed find one dollar, for which send me one package of Fleming's Tonic Heave Powders. I have a four-year-old horse that has a cough and has had it for over a year. I have used your Tonic Heave Powders with wonderful success. A fourteen-year-old mare I have was always in poor flesh and her hair was rough and dead looking. I gave her the powders and now she is slick and fat on half the grain she formerly ate, so I attribute it all to the powders.—A. G. Wilson, Afton, Tenn.

Neighbor Got "Soaked."

Dear Sirs:—Enclosed find money order, for which please send me another box of your Tonic Heave Powders. Now, I suppose you are wondering why I am sending for so many packages. The last I sent for was for my neighbor, who got "soaked" on a horse trade. The horse was so bad that he could not move him. He fed the powders, and now you cannot see a thing wrong. This box is for another friend of mine.—R. Manske, Sunnybrook Farm, Menomonie, Wis., R. F. D. No. 3.

Bought a Hide and Got a Horse.

Dear Sirs:—Three years ago I bought a horse for five dollars. This horse had heaves, I think, of the worse kind, as it had been entirely worthless for a long time and was hardly able to walk a mile without stopping. Its owner told me he was going to kill it. I told him if he killed the horse, all he would have would be the hide, and that I would give him all the hide was worth, and he would not have the trouble of killing it. So I bought the horse for five dollars; then I ordered some of your Tonic Heave Powders, and after using it for four weeks, I drove the horse to Watertown, a distance of sixteen miles, and I sold that same horse that very same day for \$75 cash money to a Milwaukee horse dealer. Now, this is no empty talk, but it is a straight, honest fact, and I can prove it by more than a dozen of my neighbors. If this letter is of any use to you, I say use it, as I am ready to back every word it contains.—A. E. Baneck, Sullivan, Wis., R. F. D. No. 2.

Like a Six-Year-Old.

Gentlemen:—Enclosed find money order for one dollar. Please send me one package of Fleming's Tonic Heave Powders. I used a package on a sixteen-year-old mare that showed indications of heaves for six months. Her wind is all right now and she is in good condition. Looks and acts like a six-year-old.—W. M. Hurley, Morrisdale, Pa., R. F. D., Box 49.

As a Tonic.

Gentlemen:—Enclosed you will find one dollar, for which please send me one package of Fleming's Tonic Heave Powders. I used one package of this, not for heaves, but to put the digestion and system in good condition, and I consider it the best medicine for that purpose that I ever gave to a horse.—H. W. Cockerham, Austin, N. Car.

Worth \$50 More.

Dear Sirs:—Please send me two packages of your Tonic Heave Powders. I got two packages some time ago and my mare is of \$50 more value than she was before I commenced to use the powders. I am now sending for a neighbor. Please send a Pocket Adviser.—Harold Campbell, Jefferson, Ohio, R. F. D. No. 4.

Sound Nine Years.

Gentlemen:—Nine years ago I had a mare that had the heaves, and after using one and a half boxes of Fleming's Tonic Heave Powders, she seemed to be completely cured. I have not seen any signs of them since. I recommend the powders to all my friends as the best remedy for heaves.—Norman C. Selleck, Middlebury, Vt., R. F. D. No. 5.

Try Fleming's General Liniment

If you have a case of any kind that ought to be helped by use of a liniment, and the liniment you have used hasn't helped it, try Fleming's General Liniment. This liniment is made to do the utmost good that a liniment can do, and not to merely smell strong and fill a bottle.

Colic Mixture

Sent prepaid for \$1.

See assortment offer on inside of back cover.

So many people neglect it, then order a bottle of Fleming's Colic Mixture after they have lost a horse, and are in that way reminded how important it is to be prepared for colic.

Now, this can serve to remind you of the same thing, and at no cost to you.

We do not claim that it is sure and infallible, nor is there any remedy that is, but it is a mighty good thing to have on hand, and we believe that it will do more to protect you against colic loss than anything else that you can get.

You have horses, and you know that they may die of colic.

You know, too, that there isn't any time to be wasted when a bad case of colic gets hold of a horse.

There won't be any time to get Fleming's Colic Mixture then—and perhaps no time to do anything else.

Get it now and be ready.

If everybody would just do that there wouldn't be much colic loss.

You don't need the Actinoform until you have a case of lump jaw, and so on through the list until you come to the Colic Mixture, but there you have arrived at something that you need all the time—need it for the security it affords—need it because you have to have it when needed if it is to save your horse.

The bottle contains eight doses, and one to three doses are enough. The directions tell how to recognize different forms of colic and how to give the Colic Mixture.

Order a bottle, and if it ever fails, ask for your money back. Even if you shouldn't need it, you'll feel better for having it, and that in itself will be worth the dollar it costs.

Saved Valuable Horse.

Dear Sirs:—I enclose remittance of one dollar to pay for a bottle of Fleming's Colic Mixture. I do not want to get out of this. I saved a valuable horse yesterday with the second dose.—L. J. Mendorf, Drummond, Idaho.

Sure The Thing.

Dear Sirs:—Please send me one bottle of your Colic Mixture for the amount enclosed. It sure is the thing to knock the colic, the best I have ever tried. I would not be without it.—Chas. H. Wies, Aspen, Colo., Box 587.

Saved Two in One Week.

Gentlemen:—Please find enclosed money order for one dollar, for which send me one bottle of Colic Mixture. I can't get along without it. It saved me two horses this week. It beats any remedy I ever used.—Wm. Snyder, So. Dansville, N. Y., P. O. Box 135.

Four and Some Left.

Gentlemen:—I am ordering a bottle of your Colic Mixture. I cured four cases of colic with one bottle and have some left. Send me also your Veterinary Adviser.—A. M. V. Shockley, Madison, Okla., Route No., Box 44.

Perfect Success Every Time.

Gentlemen:—I have used several of your remedies and find none better, especially the Colic Mixture, which I have used so often with perfect success every time. I am from Pennsylvania and have been here five years. I stopped at the Stock Yards last fall on my way to Pennsylvania with forty-four head of horses, but did not have time to have a talk with you.—J. S. Lawhead, Glendale, Ariz.

Cured Three.

Dear Sirs:—Enclosed find three dollars, for which please send me your Spavin Liquid and Colic Mixture. I have cured three bad cases of colic with one bottle and can't afford to be without it.—John A. Anderson, Concord, Tenn., Route No. 2.

Saves Five or Six a Year.

Dear Sirs:—I received your Veterinary Adviser, for which I thank you. I have used your medicines for over fifteen years, and they have always stood on their merits for me. I have saved at least five or six horses every year with your Colic Mixture. There is no veterinarian nearer than Rapid City and Deadwood, and that is thirty-five to forty miles away.—Henry Marshall, Whitewood, S. Dak.

Valuable to Have.

Gentlemen:—Enclosed please find money order for one dollar, for which send me a bottle of Fleming's Colic Mixture. I only have about one dose left, so please send at once, as I do not like to be without it. I have used it for years and know what a valuable thing it is to have.—Roy M. Baker, Springfield, S. Dak., Route No. 3.

Orders Good Supply.

Gentlemen:—Enclosed please find five dollars, for which send me six bottles of Fleming's Colic Mixture. I have never yet had to give more than one dose, but am ordering a good supply to have on hand when needed.—Thomas Holt, Maple View Farm, Southington, Conn.

Doctors Gave Up.

Gentlemen:—I want to speak a word to you about your Colic Mixture. A neighbor of mine had a sick mule. The doctors gave him up. I gave him three doses of the Colic Mixture according to directions, and in a short time he was on foot. I do think it is the greatest medicine I ever saw. I can't afford to do without it and am ordering another bottle, as you will see by the enclosed order blank. Please send me two of your Veterinary Advisers. I have a friend whom I want to give one to.—J. W. Turner, Burlington, N. Car., Route No. 3, Box 118.

Colic a Day Old.

Dear Sirs:—I am sending you an order for a bottle of Colic Mixture. Just used the last of the old bottle yesterday on a bad case of spasmodic colic a day old. I had used half a bottle of another colic medicine when I remembered of having part of a bottle of Fleming's Colic Mixture. I gave him two doses and he acted better, so I gave him the third dose and stayed with him for a while. He was so bad that I practically gave him up as gone and went away to work, and in a short time I found him all right.—V. S. Clute, Landa, N. Dak., Box 206.

Started for the Woods.

Gentlemen:—I just received your Almanac. Thanks for same. I am never out of your Colic

Mixture. I have had several bad cases of colic, but never lost a horse. Never had to give more than two doses except once, and that was a mare that had a bad case, and I had to give her the third dose. An hour after that she seemed no better, and I told my wife that the mare was going to die and that I was going to lead her out to the woods to keep from dragging her out next morning. I got her about half way and could not get any further with her. She laid down and I left her there. The next morning the mare was at the house eating grass in the front yard.—Wm. Friese, Bixby, Okla.

The Doctor's Friend.

Gentlemen:—Enclosed I hand you remittance, for which please send me three bottles of your Colic Mixture. Colic cure would be the proper name for it. It is always my friend. Of course, I have many good remedies, but always have to have the druggist put them up and it takes time.—John D. Caldwell, D. V. S., All Forms of Colic a Specialty, Camden, Ala.

Saved \$250 Mare.

Dear Sirs:—Please send us one bottle of Colic Mixture, one dollar enclosed. One bottle of your Colic Mixture saved a \$250 mare for us.—T. A. Law & Sons, Breeders of Aberdeen-Angus Cattle, Buckhannon, W. Va., R. F. D. No. 2.

Not a Failure in Fifteen Years.

Dear Sirs:—I am almost out of your Colic Mixture. Please find enclosed one dollar for another bottle. I would not be without it at any price. I never had it fail in fifteen years, and I have cured a good many horses, some that others said would die sure, but I brought them out all right.—D. J. Carleton, Sterling, Mich., R. No. 1.

"It Is the Cheese."

Gentlemen:—I want to speak a word for your Colic Mixture. My neighbor has a mare that he found with colic the other morning when he went out to feed. She was down all day rolling and tumbling until sundown. I got there just at sundown, and gave her the first dose of your Colic Mixture at six o'clock. I waited until seven o'clock and gave the second dose, and by eight o'clock she was quiet and easy. The next morning she was up picking. That was the first time I had ever used any of it. I ordered it last spring, but this was the first chance that I had ever had to try it, but I will say that "it is the cheese."—James C. Hampton, Woodbury, Ky.

Thought She Was Dead.

Dear Sirs:—I am dropping you a few lines to thank you for the Almanac and to let you know that I am not a stranger to your remedies, as I used them in 1907, 1908, 1909 and 1910. I used your Eye Lotion on a mare that I thought was almost blind, but one bottle cured her entirely. I also used your Colic Mixture on one of my horses, and along in corn-planting time in 1909 a neighbor came to me asking if I knew anything about sick horses, as he had one down in his cow-yard that could not get up and two different veterinarians had told him that they could do nothing more for her and that she would be dead within the hour. I told him to wait until I went in the house and told my wife where I was going, and I slipped my bottle of your Colic Mixture in my pocket. When I saw the mare, she was swollen so that I thought from a distance that she was dead. I asked for a pint of fresh milk and fixed a dose, and we got it down her. In about twenty minutes the mare got up, and in thirty minutes I gave her another dose. In an hour from the time that I gave her the first dose, she was eating her dinner, and in the afternoon the man worked her to the corn planter. I cured four other horses, making six in all, from the one bottle. A man with horses should never be without it.—Wm. H. Wisham, Clearview Truck & Poultry Farm, Marshallton, Del., R. F. D. No. 1.

Sweeny Blister

Sent prepaid for \$1.

See assortment offer on inside of back cover.

Most farmers know what sweeny is like and recognize it when they see it, as it is a common ailment among farm horses, particularly young animals that have recently been put to heavy work. For a description of sweeny, see Fleming's Vest-Pocket Veterinary Adviser.

It is well to give sweeny early attention, because in time, what is called fatty degeneration, may set in, rendering full restoration of the muscle impossible. Therefore, if you do not care to treat with Fleming's Sweeny Blister, take your sweenied horse to a veterinarian.

Fleming's Sweeny Blister is used by applying lightly upon one or two small spots over the shrunken muscle, repeating on different surfaces at intervals of about two weeks if necessary. It is better to give rest, and complete rest is essential if the horse is lame.

Full directions accompany each bottle.

Fleming's Sweeny Blister is guaranteed—Your money back if it fails.

Cured Ten.

Gentlemen:—I am sending you an order of one dollar, which you will find enclosed, for one bottle of Fleming's Sweeny Blister. Please send it to me at once, as I have a work mule in bad shape. I have used one bottle of your medicine and can recommend it to do the work. I have cured ten head of horses and mules for myself and neighbors.—Artie M. White, Montgomery City, Mo., R. F. D. No. 2.

Four With Half a Bottle.

Gentlemen:—I will say that with one bottle of your Sweeny Blister I have cured four bad cases of sweeny, and have enough left to cure as many more. I have more than half the bottle left.—N. B. Flatt, Hysham, Mont., Box 20.

Expects to Cure More.

Dear Sirs:—I received your Sweeny Blister, and I thank you for sending it so promptly, for I needed it very bad. I have cured two cases of sweeny and expect to cure five or six more. I recommend your remedies to all my friends.—Rudolph Janssen, Upland, Nebs., R. F. D. No. 3, Box 6.

Had Sweeny Three Years.

Dear Sirs:—I received one of your Almanacs a short time ago, and looking over some of the cures your remedies have produced, it would seem doubtful to one who had never tried your remedies. In March, 1914, I had a mare fourteen years old that had had the sweeny for three years. She was so bad she could hardly get up. I sent you one dollar for a bottle of your Sweeny Blister, treated her a few weeks and she went to work. Few horses can out-pull her today.—Joseph T. Matlick, Rutledge, Mo.

Sound as a Dollar.

Gentlemen:—Please accept my thanks many times for your Sweeny Blister. I have a colt that will be four years old the last of this next April. I broke him last summer, but did not work him much until last fall. I commenced to break sage brush and sweenied him, and it was four months after that before I got your Sweeny Blister. He is as sound as a dollar now. You may use this letter if you like.—E. L. Reynolds, Encampment, Wyo.

Two Applications Did It.

Gentlemen:—The Sweeny Blister you sent me did the work. It is the best remedy for sweeny I ever saw. Two applications did it.—L. H. Jones, Chavies, Ala., Route No. 2, Box 95.

Absolutely Good.

Dear Sirs:—I herewith hand you three dollars, for which please send me three bottle of Fleming's Sweeny Blister. I have used this medicine on four or five cases and find it absolutely good.—C. W. Whitehead, Real Estate and Investments, Isabel, S. Dak.

A Horse and Two Mules.

Gentlemen:—The Sweeny Blister I ordered from you has cured my horse and has also cured two of my neighbor's mules, one of shoulder sweeny and one of hip sweeny. Enclosed find two dollars for two packages of your Tonic Heave Powders.—R. L. Payne, Livingston, Ky.

A Bad Case.

Dear Sirs:—I sent to you and got a bottle of your Sweeny Blister some time ago, and it has done the work all right. My mare was very badly sweenied in both shoulders. I had to give her four or five treatments.—W. W. Matheny, Bear, Idaho.

Said It Wouldn't Fill Out.

Dear Sirs:—I had a valuable percheron colt sweenied last spring. An old horseman told me that it was too bad to ever fill out. I used less than one-fourth of a bottle of your Sweeny Blister, and the shoulder is as good as ever today.—B. H. Scott, Oswego, N. Y., Route No. 3.

Cured Two Years Ago.

Dear Sirs:—Send me a dollar bottle of your Sweeny Blister. I have cured one horse two years ago, and she is all right now. Send it as soon as you can. Remittance enclosed.—Leonard L. Stanceliff, Edinboro, Pa., Route No. 2.

Cured Five.

Dear Sirs:—Will you please send me your Vest-Pocket Veterinary Adviser? I had one, but gave it to a man who had a horse sweenied and did not know about your remedies. That Sweeny Blister that I got from you has cured five cases and has not failed yet. Have used only about half the bottle.—Elton E. Parker, Meridian, Idaho. Route No. 1, Box 227.

A Good Assortment.

Gentlemen:—I bought a bottle of your Sweeny Blister about three years ago, and I cured a mare that had the sweeny on one hip, and three mules that had sweeny in both shoulders, and two mules that had it in one shoulder and a horse that had it in one shoulder, and I have plenty of the medicine left. You may publish this if you think it will be of help.—W. R. Acuff, Washburn, Tenn.

After the Sixth.

Sirs:—Enclosed find money order for one dollar, for which please send me one bottle Sweeny Blister. Your medicine is surely all you claim it to be. I have already cured five horses, and here goes for the sixth.—Raymond W. Kos, Riverside, Iowa, Route No. 2.

General Liniment

Sent prepaid for \$1.

See assortment offer on inside of back cover.

We want those who purchase Fleming's General Liniment to expect better results from it than they have obtained from the various cheaper liniments that are being sold, and if in use it fails to fulfill such expectations, we are ready to refund the price paid for it.

Most people are familiar with liniments, and know what sort of cases they are generally used upon. Fleming's Liniment is for external use in the treatment of any case in which a liniment would ordinarily be employed, such as sprains of various kinds, bruises, soreness or lameness in muscles or tendons, swellings, etc. One important use that we want to mention especially is for the treatment of garget or caked udder in milch cows. If you ever have trouble of that kind, we feel sure that you will appreciate this liniment if you once give it a trial. Various other uses are mentioned in our Veterinary Adviser, and also in the directions that accompany the package.

Though Fleming's General Liniment is primarily intended for veterinary use, it is just as suitable as a general family liniment, and we could not make a better one. We do not mean to advertise it strongly in that way, because we want to confine our attention to veterinary lines. However, a human ache should command as much respect as an ache in an animal, and a number have written us telling of the personal good they have received from use of this liniment, so some of these letters are published here.

Whether you use Fleming's General Liniment upon an animal, or for the relief of human ailments, such as muscular rheumatism, lumbago, stiffness or soreness in muscles, sprains, bruises, etc., it is guaranteed, and your money will be refunded if you do not find it highly satisfactory.

Stifle Lameness.

Dear Sirs:—I purchased a bottle of your General Liniment, which I used on my mare for stifle lameness. It was a long-standing case, but I made only three applications and have not seen any signs of the lameness since and I have given her long drives. It is one of the best liniments that I ever saw, and I can highly recommend it to any one. Many thanks for the Vest-Pocket Veterinary Adviser.—E. J. Bell, Cuttingville, Vt.

Bad Foot.

Dear Sirs:—I have a mare that got so lame she could hardly put her foot to the ground. It was the right front foot. I could see no sign of injury about the foot until about the fourth day the hoof began coming loose at the heel, and it kept on and seemed to come loose all the way

THIS LETTER IS FROM

FLEMING BROS.

CHEMISTS

UNION STOCK YARDS

CHICAGO, ILL.

around. A thick, yellow corruption came out all the way around, and it smelled very bad. I sent you an order for a bottle of General Liniment and asked you to name this disease. You said you could not tell me exactly what it was, but I used the Liniment, and it cured her foot with three applications. I had thought that it was too late to use anything that would do any good. I think your Liniment is great.—J. T. Ferguson, Linden, Tenn., Route No. 1, Box 13.

Sprained Tendons.

Dear Sirs:—Last winter I had a horse with sprained tendons, and he was so lame he had been unfit for work for some time. Your General Liniment fixed him up O. K. and I sold him for \$175.—A. T. Lorimer, Collyer, Kansas.

Other Liniments Failed.

Gentlemen:—I enclose one dollar, and want you to send me one bottle of your General Liniment. Two years ago I had a pain in my knee. I bought a bottle of your Liniment and it cured it after I tried several other liniments and they had failed. You will please find money order enclosed.—Mary McKenzie, Eagle Springs, N. C., Route No. 1, Box 94.

Relieved Rheumatism.

Dear Sirs:—About two years ago I got three bottles of your General Liniment, which I used for rheumatism. It helped and cured my knees and ankles. I never was bothered again until now. I have been quite bad for six weeks. I had a doctor, but have received no relief, so I thought I would try your Liniment again.—Mrs. Julius Schroeder, 901 First Ave., East, Oelwein, Iowa.

Garget.

Sirs:—I am glad to tell you that your General Liniment completely cured my cow of garget and now that same quarter that was affected is the best and gives more milk. I used only one bottle. Kindly send me your Veterinary Adviser. I gave the one I have to a farmer friend of mine.—R. G. Gibbs, Pine Ave., Niagara Falls, N. Y.

Best for "Man or Beast."

Dear Sirs:—Please send me a bottle of your General Liniment. It is the best liniment I have ever tried for man or beast. Please send and oblige, Rufus Moore, New Madison, Ohio, R. F. D. No. 2.

Put Them Back in Harness.

Gentlemen:—A few words concerning your General Liniment. We had two mules that were unable to work on account of strains. Neither was able to use the leg affected. Two bottles put both back in harness. We think it is the greatest liniment in the world.—Joe S. Davis, Rain, Ky.

Helps Rheumatism.

Gentlemen:—I received the bottle of General Liniment and have been using it for rheumatism, and must say that it is helping wonderfully. You will find enclosed two dollars for which please send me two more bottles.—J. D. Toombs, Enfield, Ill., R. F. D. No. 1.

Best He Ever Used.

Dear Sirs:—I would like to have a copy of your Farm and Live Stock Almanac. I had one last year and it is very convenient. I have found your General Liniment the best I have ever used.—Wm. Smith, Durkee, Ore.

Could Hardly Do Without It.

Dear Sirs:—Enclosed please find money order for one dollar, for which please send me one bottle of your General Liniment. I have used nearly one bottle, and feel that I could hardly get along without it.—F. A. Lentz, Clarion, Iowa, R. F. D. No. 5.

Veterinary Healing Oil

Sent prepaid for 50 cents.

See assortment offer on inside of back cover.

Small wounds neglected may become more serious than large ones that are given attention, and there are more of them. It is surprising how often we hear of an animal becoming almost worthless from a wire cut so small that it was thought to be of no importance.

Keep Fleming's Veterinary Healing Oil on hand, and use it on the small cuts as well as the large ones. It is something that you are practically certain to have use for. We know of nothing to equal it for cuts and wounds of various kinds, collar galls, sores, burns, etc. Your money back if you are not satisfied.

Worth \$10.

Gentlemen:—Enclosed find fifty cents, for which send me one bottle of Fleming's Veterinary Healing Oil. A bottle of it is worth \$10 to me now.—Matt. Thompson, Marengo, Wis., Route No. 1, Box 82.

Part of Foot Cut Off.

Dear Sirs:—I have a few words to say about your Healing Oil. I sent to you about six months ago for a bottle to use on a fine two-year-old driving filly, which had run her foot through a wire fence and had cut the whole back of the foot off. I used one bottle of the Healing Oil and it did the work the best I ever saw. My wife cut two of her fingers almost off, and we tried the Healing Oil on one and another medicine on the other, and the Healing Oil capped it all. It is great.—Newton Chandler, Austin, Ind., Route No. 3, Box 105.

Nothing Else Would Heal.

Dear Sirs:—Enclosed please find one dollar, for which send me two bottles of Veterinary Healing Oil. I have a horse with a sore on his foot, just above the hoof, which nothing else will heal, but the Healing Oil is working fine. I do not like to be without it.—C. E. Deming, Vallejo, Calif., Box 121.

An Old Wound.

Gentlemen:—I have a mare seven years old that got hurt about a year and a half ago, and I could find nothing to heal the wound. I got your Healing Oil. She was hurt in the left hock. It has now healed up all right, but the part is still enlarged.—P. H. Taylor, Garrison, Pa.

Best He Ever Saw.

Gentlemen:—I received the Healing Oil all right and am using it with great success on my mare which cut her foot on a tile. I also had a driving horse kicked and cut badly, and by using the Healing Oil I never had better results. It seemed that he was nearly cut through the wall of the chest. Everybody thought it would leave a bad scar, but it did not. Will say that your Healing Oil is the best thing I ever saw.—S. Switzer, Defiance, Ohio, Route No. 9.

Veterinary Eye Lotion

Sent prepaid for 50 cents.

See assortment offer on inside of back cover.

Fleming's Veterinary Eye Lotion is for soreness and inflammation of the eyes of animals. It is not intended to restore the sight in a case of blindness, nor will it improve the vision in partial blindness if the eye structure itself has been impaired by injury or disease.

For moon blindness of horses there is nothing better that we know of to relieve the inflammation and protect the sight, but the attacks are likely to recur at more or less frequent intervals, as the disease is generally considered to be of a constitutional character and incurable.

When soreness of the eyes exists or a symptom in connection with some acute disease, as in what is commonly called "pink eye," the Lotion is useful to relieve the eyes, but does not in itself constitute an adequate treatment for the whole trouble. If the eyes are swollen, inflamed, sore, watery, etc., use Fleming's Veterinary Eye Lotion. We refund your money if it is not satisfactory.

Can't Tell It Now.

Gentlemen:—I have a mare that was seemingly losing her sight in one eye and the other eye was badly affected also. Everybody told me she was a blind mare. I used one bottle of your Veterinary Eye Lotion and you can't tell it on her now. I am ordering another bottle to have on hand.—J. A. Smith, Plad, Mo.

Perfectly Sound.

Gentlemen:—I bought a bottle of your Veterinary Eye Lotion over two years ago and cured a fine mule of what people called moon blindness. Several told me she was as good as blind, and I thought it too at times, for her eyes would get perfectly white and she could not see. I used half of the bottle and she is perfectly sound today.—J. S. Bailey, Hopper, Ky.

Nearly Blind.

Dear Sirs:—Please send me two bottles of Veterinary Eye Lotion, for which you will find one dollar enclosed. I have cured several horses that were nearly blind and that the veterinarians around here had failed to do anywith with.—E. W. Dudley, Cuba, N. Y.

To Relieve Moon Blindness.

Gentlemen:—I am ordering a bottle of your Veterinary Eye Lotion for my horse that has moon blindness. This lotion is the greatest medicine I have ever used. It has saved my horse's eyes for three years, and I do not want to be without it. One of his eyes is pretty bad now, but I think I can fix it up again. He is a fine horse, and I do not like to have him go blind.—E. E. Rathbun, Buffalo Springs, Ohio.

Chemical Hornstop

Sent prepaid for 50 cents.

See assortment offer on inside of back cover.

Just clip the hair off the horn button and stick on a little piece of Fleming's Chemical Hornstop.

It is a pasty substance and will stay where you put it.

Do this when the calf is three to ten days old and there will be no horns to saw off later.

The calf scarcely minds it at all, for it causes but little soreness.

Put up in collapsible tubes, each sufficient for twenty-five to fifty calves, but the preparation will not keep from year to year.

Money back if it doesn't stop the horns.

Treated Seventy-Five One Season.

Gentlemen:—You will please find enclosed money order for one dollar. Please send me Hornstop for the amount. I have used your Hornstop to our entire satisfaction. Dehorned seventy-five head one spring, and all of them looked like natural polled Herefords.—C. B. Black, Selfridge, N. Dak.

Never Failed.

Gentlemen:—Please find enclosed fifty cents, for which send me one tube Flemin's Chemical Hornstop, and do send it at once, as we have need for it now and should have ordered sooner. It is surely the best thing of its kind on the market. I have hever yet had an instance in which it failed.—Murray & Perkins, Braemore Farm, Helmer, Ind.

Would Buy For Every Calf.

Dear Sirs:—Please send me one package of Chemical Hornstop immediately. It is the best method of removing horns from young calves we have ever seen. If necessary, we would buy a package for every calf.—Mrs. Frank A. Richards, Blue Island, Ill., Route No. 2, Box 111.

The Cheapest Way.

Gentlemen:—I am enclosing a money order for 50 cents, for which please send me a tube of Chemical Hornstop. Am very glad to be able to get the Hornstop, and although I cannot use a whole tube before it deteriorates, I think I can well afford that, because what I use does the business and would save considerable in cash over the cost of dehorning, to say nothing of the unpleasantness of the job for both man and beast.—J. D. McMartin, Glenn, Calif.

No Horns For Him.

Dear Sirs:—I am glad to see the Hornstop on your list. I would be lost without it. My fall crop of calves will be coming in soon, and I do not want horns on them. The Hornstop does the biz all right; no horns for me.—F. H. Bristol, Manton, Calif.

Points for Special Notice

How To Get Them

Fleming's Remedies are not kept in stock at all drug stores. If your druggist handles them you may make your purchase from him, or you may send your order direct to us, accompanied by remittance in accordance with the price list in opposite column, and it will be filled the same day or the day following, depending upon whether it reaches us in the morning or in the evening. Packages are usually sent by parcel post. We pay postage and guarantee safe arrival. If you should ask at a drug store and the druggist hasn't the remedy you want, but offers to get it for you, tell him not to send the order to us, but to a wholesale drug house, as we do not open accounts with retail druggists. If the order is to be sent to us, send it yourself, in your own name, and send the remittance with it.

How To Remit Safely

There is always a collection fee on checks on banks outside of Chicago, and money enclosed in a letter is always at the sender's risk unless the letter is registered. Registered letters are safe, but the best and cheapest way to make remittance is by P. O. (or express) money order. Probably the easiest way is to remit by P. O. money order.

No Accounts Opened

We do not send goods on credit, but require that all make remittance at the time of ordering. This is a definite rule with us, made necessary by the fact that orders range small in amount and large in number. This rule applies regardless of all usual considerations, and not only to individual customers ordering for their own use, but to druggists as well. We have no accounts except with the regular wholesale drug houses.

No C. O. D. Shipments

We do not fill C. O. D. orders, either by Express or Parcels Post.

No Sample Packages or Smaller Sizes

We do not supply sample packages, or sell less than regular sizes of any of our preparations.

We Supply Nothing Else

Do not send us orders for anything other than the articles named in the price list in adjoining column. These are the only goods that we supply. We mention this because we are frequently asked to send some item that we do not have and cannot conveniently procure.

Price List

Assortment Offer

So that those who order for themselves direct from us may be more disposed to get all that is wanted at one time, instead of sending several smaller orders, we offer a reduction of \$1 on each order amounting (at the prices here quoted) to \$6 or more; \$2 reduction on each order amounting to \$12 or more, etc. It is to be understood, of course, that this applies only to orders that the customer sends direct to us, and that the entire six dollar lot must be ordered at one time.

Fleming's Actinoform (Page 4).....\$2.00

For Lump Jaw in cattle, and formerly known as Fleming's Lump Jaw Cure. One bottle is usually enough for a case, and is sometimes enough for several.

Fleming's Spavin Liquid (Page 20).....\$2.00

For Bog Spavin, Splint, Curb, etc. Formerly called Fleming's Spavin Cure (Liquid). One bottle is sufficient for any case that will yield to its use.

Fleming's Spavin and Ringbone Paste (Page 14) \$2.00

For the chronic lameness attending established cases of Bone Spavin, Ringbone and Sidebone. One bottle is usually sufficient for several blemishes.

Fleming's Fistoform (Page 8).....\$2.00

For Fistula and Poll Evil. Formerly called Fleming's Fistula and Poll Evil Cure. Cases vary as to the quantity needed. Some will require several bottles, and others will need but little. You can get an idea of this variation by reading the testimonials.

Fleming's General Liniment (Page 30).....\$1.00

This is our new preparation for use on all cases that you would ordinarily treat by applying a liniment. We hope that you will try it, and we will refund the price if you are not highly pleased.

Fleming's Tonic Heave Powders (Page 24)....\$1.00

The average quantity for case of Heaves is about two packages. Some need but one, while others require three. Used also as a general tonic and alterative for horses. Old name, Fleming's Tonic Heave Remedy.

Fleming's Sweeny Blister (Page 29).....\$1.00

Old name, Fleming's Sweeny Cure. A bottle is likely to be enough for several cases.

Fleming's Colic Mixture (Page 28).....\$1.00

Bottle contains 8 doses. Quantity for a case, 1 to 3 doses. Old name, Fleming's Colic Cure.

Fleming's Veterinary Healing Oil (Page 31).... 50c

Quantity needed depends upon what you are using it for. It is applied lightly and a bottle goes a long way.

Fleming's Veterinary Eye Lotion (Page 32)..... 50c

Each bottle, when diluted with water, makes a quart of Lotion right strength to use.

Fleming's Chemical Hornstop (Page 32)..... 50c

For use on young calves to stop the formation of horns.

Fleming's Fistula Syringe (Page 8)..... 50c

Capacity of syringe, one-eighth ounce; length of nozzle or pipe, three inches.

Extra Nozzles for Fistula Syringe, each 20c
